FULL ARGB COMPATIBLE

The front and sides of the MC-ULTRA feature a spectacular dual LED strip with ARGB lighting. Easily choose between predefined lighting modes or use the ARGB connector to control the entire system with an ARGB controller or motherboard. Choose the mode that best suits your setup and enjoy an endless range of aesthetic possibilities.

AVAILABLE IN TWO VERSIONS BLACK OR WHITE

Available in two finishes, black and white. Choose the one that best suits your setup!

XXL EXTENDED CAPACITY

New, increased size and E-ATX motherboard support. The MC-ULTRA has plenty of room for your dream PC. Install up to 7 hard drives and graphics cards up to 390mm horizontally or vertically*. The case will never be a limitation again.

DOUBLE TEMPERED GLASS WINDOW

Equipped with two full-length tempered glass windows, the MC-ULTRA case is a top-level visual spectacle. The ultimate showcase for the best hardware and the most ambitious projects.

ADVANCED COOLING

Maintaining a constant airflow is essential to prolong the lifespan of components and ensure that the system operates at peak performance. MC-ULTRA has the capacity to install up to nine 120mm fans, is compatible with liquid cooling up to 360mm and includes hidden dust filters to protect components.

CUSTOM EDITION

The MC-ULTRA is a custom case that will allow you to build the PC of your dreams without any limitations. To avoid wasting parts you won't use, the MC-ULTRA does not come standard with customizable extras such as fans or a vertical graphics card support/cable.

VERTICAL DUAL CAMERA STRUCTURE

Thanks to its vertical dual-chamber structure, MC-ULTRA separates the power supply and hard drives into a hidden side chamber for maximum cooling and space optimization.
