OTTOCAST OTTOSCREEN N95C car monitor

The OTTOCAST OTTOSCREEN N95C car monitor is a quick way to transform your car into a modern multimedia center without altering the vehicle's wiring. The device features a large 11.4-inch HD screen, Android 15, wireless Apple CarPlay and Android Auto, and a smooth interface running at 60 FPS. Built-in support for Google Gemini and "Hey Google" commands enables convenient voice control and quick access to information. The entire system runs on a powerful 8-core processor and expanded memory, allowing you to use multiple apps simultaneously. Installation is as simple as plugging it into the cigarette lighter socket, so the device is ready to use in just a few minutes.

Smooth display and large 11.4" screen

The 11.4-inch widescreen display provides a clear and detailed image when using navigation and multimedia. Support for a 60 FPS refresh rate makes the interface run noticeably smoother than in standard solutions of this type. This is especially important when scrolling through maps, switching between apps, or using CarPlay. The larger workspace also makes it easier to use split-screen mode.

Android 15 and full app freedom

The Android 15 operating system allows you to install apps without restrictions, offering greater flexibility than closed factory-installed systems. You can use navigation, YouTube, Netflix, or Spotify directly on the device's screen. As a result, the display functions as a standalone in-car tablet, rather than just an extension of your phone. In practice, this means more options for customizing features to suit your needs.

Wireless CarPlay and Android Auto

The device supports wireless Apple CarPlay and Android Auto, so you don't have to connect your phone every time. After the initial pairing, the connection is established automatically, which reduces the system's startup time. This solution also eliminates the problem of cables cluttering the dashboard. This is especially convenient for everyday use. Installation is simple and involves plugging the device into the car's cigarette lighter socket, which eliminates the need to modify the car's electrical system. The car power adapter can simultaneously power the device and provide additional ports for connecting accessories (e.g., charging a phone). The entire system is ready to go within a few minutes of plugging it in. It's a practical solution for people who don't want to replace their factory-installed radio.

Performance and multitasking

The 8-core processor, combined with 4 GB of RAM and 32 GB of ROM, ensures stable system performance even with multiple apps running. The split-screen feature allows you to use navigation and multimedia simultaneously. This lets passengers watch content while the driver keeps an eye on the road. This setup makes for a more comfortable driving experience.

Google Gemini and voice control

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The device uses Google Gemini technology, which enables the use of an advanced voice assistant. The “Hey Google” command lets you quickly launch navigation, check the weather, or search for information. This means you can operate the device without taking your hands off the steering wheel. This solution enhances convenience and helps reduce distractions while driving. To use apps such as Netflix or YouTube, the device requires an internet connection. This is most commonly achieved via a phone hotspot, which allows you to quickly share your internet connection without additional accessories. This gives you access to all online features anywhere.

Wide vehicle compatibility

The device can be used in various types of vehicles, from passenger cars to larger commercial vehicles. Support for standard car power outlets makes it ideal for longer trips as well. It’s a great solution for drivers who want to use a single system across different vehicles. Its versatile mounting options further enhance its practicality.

Included in the set

- OTTOCAST N95C monitor
- Mounting bracket
- USB cable with car charger
- AUX cable
- User manual

Manufacturer	OTTOCAST
Model	N95C
