Magnetic Pogo-Pin Interconnection: Fans snap together magnetically via pogo pins, requiring only a single cable connection from the end fan to the motherboard or hub.

Dual-Zone ARGB Lighting: Features a front light ring and side infinity mirror supporting dynamic lighting patterns and 5V motherboard ARGB synchronization.

Clean Wireless Aesthetics: Unused side connection ports are sealed with included magnetic caps to maintain a sleek, wire-free appearance.

Aircraft Turbine-Inspired Blade Design: Connected shroud ring reduces blade vibration, prevents vortex backflow, and maximizes directional airflow pressure.

Dual Ball Bearing Construction: High-grade dual ball bearings offer superior heat resistance, long-term operational stability, and enhanced durability for radiators and heatsinks.
