

**GREEN CELL
power inverter
12V-230V
2000W/4000W
with LCD display
- pure sine wave**

Model: INVGC12P2000LCD

Manufacturer: GREEN CELL

Product Code: 1290914

R4,397

The Green Cell DC to AC power inverter transforms DC 12 V power into AC 230 V, making it suitable for various applications. With a power output of 2000 watts, this inverter can handle a variety of devices and appliances efficiently. It features a pure sine wave output waveform, ensuring that sensitive electronics receive clean and stable power.

Equipped with an LCD display, users can monitor important information about the inverter's operation. Additional features such as active cooling via a built-in fan and LED status indicators enhance usability. Safety is paramount, as it comes with multiple protection mechanisms, including overheat, overcharge, short-circuit, and overdischarge protections.
