

Revopoint Magnetic Markers (208 pcs.)

Model: CODED-TARGETS-(MAGNE

Manufacturer: REVOPOINT

EAN: 6975577880826

Product Code: 1291144

R1,958

Revopoint Magnetic Markers (208 pcs.)

Revopoint Magnetic Markers are a set of coded reference points designed to streamline the 3D scanning process. They are engineered to work with the MIRACO Plus scanner, facilitating precise object tracking and improving mapping accuracy. The magnetic mounting method allows you to quickly prepare the surface without using glue, which is convenient when working with metal elements.

Precise tracking and stable scanning

Each marker has a unique code that allows the scanner to better orient itself in space. This makes the scanning process smoother and reduces the risk of losing track of the object. This directly translates to more accurate 3D models and fewer corrections during post-processing.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Convenient magnetic mounting

The use of magnetic mounting allows the markers to be attached and removed repeatedly without leaving marks on the surface. This is particularly useful when working with metal parts, where quick setup and the ability to reuse markers are essential.

Compact size and versatile application

The small diameter and compact design of the markers allow them to be used even on smaller objects without interfering with the scanning process. This makes them suitable for both detailed work and larger projects.

Included

- 208 × Revopoint magnetic, coded markers

Manufacturer	Revopoint
Model	Coded Targets
Compatibility	Revopoint MIRACO Plus
Marker type	coded, magnetic
Spot diameter	5 mm
Marker size	22 × 22 mm

Mounting method magnetic (no glue required)
