

2-Zone Irrigation Controller with RainPoint WiFi Gateway

Model: HTV245FRF+HWG023WBRF

Manufacturer: RAINPOINT

EAN: 5907085528502

Product Code: 1292134

R1,958

2-Zone Irrigation Controller with RainPoint WiFi Gateway

Discover the RainPoint irrigation controller—a smart solution for your garden that combines precise watering schedules for two zones with the convenience of remote control via an app and voice commands. Choose from three irrigation modes and five frequency levels to tailor watering to your plants' needs, and thanks to weather synchronization, you'll ensure optimal moisture without overwatering. A durable, IP65-rated waterproof housing and the ability to expand with additional units and sensors make RainPoint an investment that will last for years.

Two Programmable Zones and Multiple Modes

The controller supports two independent zones, allowing you to customize the schedule and watering mode for different parts of your garden. Each zone allows you to create up to 6 separate schedules, with three operating modes: normal, interval, and cycle & soak. Additionally, in the app, you can choose one of five watering frequencies to optimize water usage and avoid overwatering. It's the perfect solution when you want to provide optimal conditions for plants with different needs.

The App and Convenient Control

Connect to your home's 2.4 GHz network and manage the controller from anywhere. In the RainPoint Home app, you can create and modify schedules, check your water usage history (last 30 days or one year), and receive notifications about low battery, low water levels, or valve malfunctions. What's more, the controller automatically syncs with local weather data. Set the weather conditions (rain, snow, cloud cover) in the app, and the device will adjust the watering schedule, delaying or speeding up cycles depending on the weather. You can also activate watering with a voice command thanks to compatibility with Amazon Alexa and Google Assistant.

Thoughtful Design

The controller's housing is fully dust- and water-resistant (IP65), ensuring reliable operation in rain, heat, or cold. The included Wi-Fi hub can support up to 4 controllers, and each controller can support one soil sensor per zone. This makes it easy to expand your system on larger plots or in gardens with varied topography.

Included in the set

- irrigation controller
- Wi-Fi hub
- USB Type-C cable
- user manual

itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

Manufacturer	RainPoint
Model	HTV245FRF+HWG023WBRF
Wireless range between the hub and the controller	250 meters (in open space)
Water pressure	0.5–8 bar
Water flow rate	5–35 L/minute
Operating temperature	3°C–50°C
Power supply	4 AA batteries (not included)
Water resistance	IP65
Water inlet	NH (US) for 3/4" threads, BSP (EU) for 3/4" or 1" threads
Water Outlet	Standard 3/4" garden hoses

Wi-Fi Hub

Wireless range between the hub and the router 220 m

Power Supply	Type C plug-in power adapter
Operating Temperature	3°C–40°C
Wi-Fi frequency	2.4 GHz

Gross weight: 620, Net weight: 510, Box length: 18,00, Box width: 14,00, Box height: 7,50,
