

RainPoint 8-Zone WiFi AC Irrigation Controller

Model: HIC1208W

Manufacturer: RAINPOINT

EAN: 5905156104778

Product Code: 1292139

R1,958

RainPoint 8-Zone WiFi AC Irrigation Controller

Ensure your garden is perfectly watered without having to keep track of the watering schedule every day. The RainPoint 8-Zone WiFi AC is a modern irrigation controller that allows you to independently manage up to 8 watering zones and the master valve. Thanks to Wi-Fi connectivity and mobile app control, you can manage the entire system from anywhere, create detailed schedules, monitor operation history, and adjust watering to current weather conditions. The weatherproof design for outdoor installation, sensor support, and smart automation features mean the device effectively saves time, water, and energy while ensuring your lawn and plants look healthy.

Smart watering that thinks for you

Forget about manually turning on sprinklers and wasting water unnecessarily. The controller uses smart weather features that help adjust watering to current weather conditions. The ability to work with two sensors allows for even more precise monitoring of the environment and responding to changing weather. This ensures your garden gets exactly the amount of water it needs, while you reduce water consumption and landscaping costs.

Full control over 8 zones via the app

Different parts of the garden have different needs—that's why RainPoint allows for independent control of up to 8 irrigation zones. Each zone can have its own schedules and operating parameters, allowing you to perfectly tailor watering to the type of plants, size of the beds, or sunlight exposure. A convenient mobile app allows you to remotely manage the system via Wi-Fi, view active cycles, and quickly make changes without having to go to the controller.

Extensive schedules for maximum convenience

The device offers up to 8 watering schedules for each valve, providing extensive configuration options. You can create schedules tailored to the season, plant type, or specific days of the week. The built-in calendar lets you conveniently check scheduled cycles, and the manual start and stop functions for zones provide full flexibility when you need an immediate response. This solution is ideal for both home gardens and more extensive irrigation systems.

Years of reliability and full insight into system operation

RainPoint is designed for outdoor use, so its waterproof construction effectively protects the electronics from the elements. The controller records historical data on system operation, allowing you to analyze irrigation usage and better plan your garden care. The valve monitoring feature and integration with the RainPoint device ecosystem allow you to build a modern, automated landscape management system. The result? Less work, more control, and a garden that looks stunning all season long.

Included:

- RainPoint HIC1208W WiFi 8-zone irrigation controller

- Watering schedule
- User manual
- Mounting template
- Mounting screws and wall anchors (4 sets)

Manufacturer	RainPoint
Model	HIC1208W
Number of supported zones	8
Master valve control	Yes
Connectivity	Wi-Fi
Control	Mobile app
Sensor support	Up to 2 sensors
Number of irrigation schedules	Up to 8 schedules per zone
Maximum number of schedule configurations	Over 64
Additional features	Historical data logging Smart weather-based control Automatic operating scenarios Seasonal irrigation adjustment Integration with the RainPoint ecosystem Valve operation monitoring Calendar view of schedules Manual start and stop of zones
Intended use	Outdoor installation
Construction	Waterproof
Operating temperature	3°C to 50°C
Storage temperature	-10°C to 50°C
