PXN WCS R2 gaming steering wheel

The PXN WCS R2 is a steering wheel designed for maximum realistic experience in racing simulators. With a large diameter of 330 mm and a solid leather construction, driving a car in the virtual world is even closer to reality. The steering wheel operates wired via USB and is fully compatible with PCs (Windows 7-11). In addition, the steering wheel uses an aluminum Quick Release mechanism that allows it to be easily and safely detached from the base.

Precision carbon fiber paddles

Shifting gears is done with carbon fiber paddles that use Hall sensors. As a result, the response is fast and precise, and the operation of the blades themselves is smooth and light. The technology used eliminates lag and ensures long life without mechanical wear.

Full control and programmable buttons

The PXN WCS R2 is equipped with 13 buttons and a 20-position rotary encoder, which allows you to precisely set parameters such as brake balance, traction control and ABS. In addition, the steering wheel supports RGB backlighting - as many as 12 zones can be customized according to your style or gaming needs, creating not only a practical, but also an impressive set.

PXN SimRacing software

Thanks to the dedicated PXN SimRacing software, the steering wheel can be configured for your own needs. The program allows you to set buttons, change profiles for different games and personalize the backlighting. Popular simulators such as Assetto Corsa, Forza Horizon 5, DiRT Rally 2.0, EA WRC, F1 Series or Euro Truck Simulator 2 are supported.

Manufacturer	PXN
Model	WCS R2
Connection method	wired, USB
Material	Leather
Steering wheel diameter	330 mm
Gear shift paddle material	Carbon fiber Hall effect
RGB steering wheel	Supported
Software	Supported
Compatible platform	PC (Windows)
PC mode	D-input
Pedal technology	Hall magnetic induction linear pedal

Gross weight: 3220, Net weight: 2500, Box length: 41,00, Box width: 39,50, Box height: 17,50
