PXN PD HM pedal set - brake and gas (Windows 7/8/10/11)

PXN PD HM is a robust set of brake and gas pedals that provides an authentic racing simulation experience. Thanks to its metal construction, automatic calibration and high-precision operation, you can enjoy full control over your vehicle - from smooth acceleration to dynamic braking. The hardware works with Windows 7/8/10/11 PCs and is compatible with the PXN base.

Stability and durability of construction

The kit is made of durable materials that guarantee resistance to intensive use and stable operation even in demanding conditions. Each component is designed to withstand dynamic maneuvers during play.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Automatic calibration for perfect control

The pedals automatically calibrate the first time they are fully pressed, ensuring precise reproduction of movements. This means you don't have to waste time on manual adjustments - you can focus on the competition right away.

Easy installation and setup

Assembling the kit takes only a moment - just connect the pedals using an RJ11 cable, plug the USB cable into the PC and, if necessary, configure the parameters in the dedicated PXN SimRacing software. The compact size makes it easy to adapt the pedals to your gaming space.
