DDPAI Z90 Master 4G Dash Cam

The DDPAI Z90 Master 4G is a dash cam featuring a front camera equipped with an 8-megapixel Sony STARVIS 2 IMX678 sensor and a rear camera with a 5-megapixel Sony STARVIS 2 IMX675 sensor. The front camera records video at a resolution of up to 3840 × 2160 at 30 fps, while the rear camera offers a resolution of 3840 × 2160 at 25 fps. The device also features a 3-inch screen, a GNSS module, a 3-axis G-sensor, voice control, 5 GHz Wi-Fi, Bluetooth 5.1, and compatibility with a 4G module that provides a 4G network connection.

Sony STARVIS 2 Sensors and a Wide Recording Range

The front camera uses a 1/1.8" Sony STARVIS 2 IMX678 sensor with 8 MP resolution and an F1.75 aperture lens. It can record at 3840 × 2160 at 30 or 25 fps, and when set to 2880 × 1620 resolution, the frame rate increases to 60 fps, allowing for smoother recording of dynamic situations. The 135° field of view covers a wide section of the road, while the rear camera, equipped with a Sony STARVIS

2 IMX675 1/2.8" sensor 5 MP, an F1.7 aperture, and a 126° field of view records video at an output resolution of 3840 × 2160 at 25 fps.

4G Connectivity

The dashcam supports 4G connectivity, which enables remote communication via a cellular network. A Nano-SIM card is required to use this feature, allowing the device to connect to the internet regardless of the availability of nearby Wi-Fi networks.

Screen, App, and GNSS Location

The built-in 3-inch screen with a resolution of 640 × 360 allows for convenient control of the dashcam’s operation without having to reach for your smartphone every time. Wi-Fi 5 GHz and Bluetooth 5.1 are used for wireless connection to a mobile device, and the app allows you to access the dashcam’s features directly from your phone. The GNSS system supports GPS, BDS, GLONASS, GALILEO, and QZSS, providing access to location data while traveling.
