R2,695

Ultimate Silent Experience

Engineered with four sides lined in high-density sound-dampening material and reinforced with 0.7mm SPCC steel panels, this case significantly reduces ambient noise and distractions. Whether you're deep into a game, focused on work, or immersed in creative projects, it creates a quieter, more focused environment, so you can stay in the zone.

120mm x4 Silent Fans

Comes with three 120mm, front fans with fan shrouds and equipped with one rear fan.

175mm High CPU COOLER

Supports CPU coolers up to 175mm in height.

Breathe Easy with Enhanced Airflow

Refined airflow design keeps components cool, while the exclusive fan shroud optimizes circulation and minimizes noise for a quieter experience.

Unleash Performance, Embrace Silence

The U530 case delivers exceptional silent performance while effortlessly supporting a 360mm radiator (Built-in two types of silent and mesh dust filters) and high-end 375mm graphics cards with a graphics card holder, perfect for powerful, quiet builds.

Classic Exterior, Spacious Interior

Featuring a clean, minimalist look, this case offers ample room for EEB and E-ATX motherboards. With optimized airflow, it's ideal for building a powerful, organized system that balances style and performance.
