Magcubic HY300PRO Projector

The Magcubic HY300PRO is a compact projector about the size of a smartphone, equipped with the latest Android 14 system and an upgraded Allwinner H726 processor. The device offers 200 ANSI lumens of brightness and a native resolution of 720p with support for 1080p and 4K content. Thanks to Wi-Fi 6 (dual-band) and Bluetooth 5.4 connectivity, it ensures a fast and stable connection, while built-in apps such as YouTube, Netflix, Prime Video, and Disney+ let you enjoy your favorite platforms without additional accessories. With a screen size ranging from 25 to 110 inches and a throw ratio of 1:0.9, you can easily adjust the projection to fit even a small space.

Flexible projection anywhere

The projector offers a wide range of image size options—from 25 to 110 inches—allowing you to create both an intimate home theater in the bedroom and a larger screen in the living room. The unique 180° rotating design enables projection not only onto a wall but also directly onto the ceiling,

giving you complete freedom of arrangement without additional tripods. Automatic vertical keystone correction ($\pm 45^\circ$ Auto) and manual adjustment allow you to instantly achieve the correct image shape, while the digital scaling function (Screen zoom 80%) makes it easy to adjust the size without having to move the device. Thanks to its universal base, the projector operates stably in desktop mode, on a tripod, and even when mounted on the ceiling.

Clear image and precise optics

The improved Allwinner H726 chipset and advanced lens coating ensure high display quality, working together to provide exceptional image stability and clarity. Manual focus adjustment via a dial allows you to precisely fine-tune details to your preferences. Full support for 1080p and 4K content ensures that even the most demanding content looks smooth and clear. Additionally, HDMI low-latency technology guarantees minimal delays, making the image even more responsive.

Smart features without additional devices

Thanks to the built-in Android 14 system, the projector functions as a fully self-contained multimedia center. Pre-installed streaming apps, such as Netflix, YouTube, Prime Video, and Disney+, provide instant access to movies and TV shows, while the dedicated App Store lets you expand the device's functionality with a single click. Full support for Miracast technology and ScreenCast service enables smooth, wireless image transmission from Android and iOS smartphones and tablets. This makes it easy to instantly share photos, videos, or presentations directly from your mobile device to the big screen.

Modern connectivity and convenient control

Dual-band WiFi 6 ensures a fast and extremely stable internet connection, resulting in smooth playback of online content without buffering. Bluetooth 5.4 allows for seamless connection of accessories such as wireless headphones, speakers, and controllers. Users also have access to low-latency HDMI ports, a USB port, and a power jack, allowing for the connection of consoles and other external video sources. The included remote control enhances the comfort of everyday use.

Compact design and easy setup

The projector stands out with its exceptionally lightweight design (approximately 363 g) and compact dimensions of 15.7 × 9.4 × 9.4 cm, making it easy to fit in a bag or backpack. Thanks to its integrated, stable base, the device can be used on a table, mounted on a tripod, or installed on a ceiling mount, allowing you to perfectly adapt the setup to any interior.
