Petkit Eversweet Max 2 Wireless Water Fountain

Ensuring your pet has constant access to fresh, clean water is one of the most important aspects of daily care for its health. The Petkit Eversweet Max 2 is a smart 3-liter fountain that encourages dogs and cats to drink more frequently, supporting proper hydration and urinary tract health. It features an advanced filtration system with sintered activated carbon, a wireless UV pump that inhibits bacterial growth, and a motion sensor that activates the water flow when your pet approaches the device. A high-capacity battery provides up to 83 days of operation on a single charge, and exceptionally quiet operation at just 26 dB ensures the fountain doesn't stress even sensitive pets. With the PETKIT app, you can monitor drinking frequency and duration, check the filter status and battery level, and remotely adjust operating modes. The BPA-free construction and the 304 stainless steel tray with a non-stick coating guarantee safety and durability.

Fresh water that encourages more frequent drinking

Many pets don't drink enough, which can negatively affect kidney function and overall health. The Petkit Eversweet Max 2 helps solve this problem by providing constantly circulating, filtered water that stays fresh and appealing to your pet. The 3-liter tank reduces the need for refilling, which is particularly convenient for owners of cats and small dogs. The water tray holds an additional 120 ml of reserve water, ensuring your pet has access to water even during a temporary power outage or if the battery runs out.

Smart Sensor Mode - water only when your pet needs it

Sensor Mode causes the fountain to automatically start the water flow when your pet approaches within 15 cm. The sensor operates at a 90° angle, activates the flow after 2 seconds, and stops it 10 seconds after the pet leaves. This keeps the water fresh and provides the pet with a natural incentive to drink. This solution helps save energy while ensuring every sip is equally fresh.

Up to 83 days of operation without recharging

The Eversweet Max 2 model is equipped with a high-capacity battery that, with default settings, can operate for up to 83 days on a single charge. A full recharge takes approximately 6 hours. The absence of external cords increases safety and eliminates the risk of curious pets chewing on cables. This is especially important in homes with young cats and dogs that like to explore their surroundings.

Advanced filtration for your pet's health

An improved filter with sintered activated carbon effectively removes unpleasant odors, impurities, and chlorine. A one-way circulation system improves purification efficiency, providing your pet with better-tasting, higher-quality water. Regular consumption of clean water supports proper hydration, which is crucial for your pet's urinary system and overall well-being.

Wireless UV pump and even higher hygiene standards

The fountain uses a wireless pump with UV technology, which helps reduce bacterial growth in the water. The pump automatically stops running when the water level is low, which increases safety and protects the device. Thanks to the wireless design, cleaning is easier, and daily maintenance of

the fountain is less time-consuming.

Control via the PETKIT app

The PETKIT app allows you to monitor drinking frequency and duration, helping you better observe your pet’s habits. This is very helpful when you want to ensure your pet is drinking enough water or notice any changes in behavior. In the app, you can also check the filter status and battery level, as well as select operating modes. You can also set your own flow and pause times, tailoring the device’s operation to the needs of a specific pet.

Exceptionally quiet operation for calm and sensitive pets

With a noise level of approximately 26 dB, the fountain operates almost silently. The gentle sound of flowing water does not stress sensitive cats and dogs, and the device can be placed in a bedroom, living room, or other frequently used room without issue. The quiet operation also encourages pets that dislike loud devices to use the fountain.

Refined design

The device is made of safe, BPA-free materials and features a 304 stainless steel water tray with a non-stick coating, which makes it easy to keep perfectly clean. Its 5-degree slope helps remove floating hair, keeping the water surface more hygienic. The fountain can be easily disassembled, and select components, including the steel tray, are dishwasher-safe, which makes regular maintenance much easier. Clear LED indicators provide real-time updates on the device’s status, and its compact dimensions of 265 x 171 x 191 mm make it perfect for both small apartments and homes with multiple pets.
