

SJCAM C400 Action Camera

Model: C400

Manufacturer: SJCAM

EAN: 6972476163876

Product Code: 1298390

R5,046

SJCAM C400 Action Camera (black)

The SJCAM C400 combines a compact design with 4K Ultra HD recording at 30 fps, making it ideal for capturing both everyday vlogs and dynamic POV shots. The stabilization system, which uses a 6-axis gyroscope and the Steady Motion V1.0 algorithm, helps reduce shake, while the wireless controller with a 2.29" rotating touchscreen allows you to preview footage and control the camera remotely. The controller works at a distance of up to 8 m, and when paired with the camera, it allows you to record 4K footage for up to 7 hours.

Compact Design and 4K Recording

The SJCAM C400's detachable design gives you greater freedom in choosing where and how to record. The small camera can be detached to capture footage from a first-person perspective and shoot from various angles, while its compact size and lightweight design make it easy to take along during daily activities and travel. The C400 records video in 4K Ultra HD at 30 fps, preserving a wealth of detail and vibrant colors in your footage. These capabilities are well-suited for everyday

vlogging and capturing important moments.

Portrait or landscape—adjust the frame to suit your content

The rotating screen makes it easy to switch between portrait and landscape recording, allowing you to adjust the image orientation to match the content you're creating. The portrait orientation is ideal for creating content for social media, while landscape works well for recording in a traditional format. The rotating display provides a convenient preview and helps you frame your shot precisely; rotating it also turns the device on.

Remote Control and Preview

The wireless controller allows you to operate the SJCAM C400 without needing direct access to the mounted camera. Via a Bluetooth connection, you can remotely start and stop recording and change settings, with a control range of up to 8 m. The controller features a 2.29" rotatable touchscreen that provides a live view, allowing you to monitor the shot in real time and control recording remotely. This is particularly useful when shooting on your own or in situations where the camera is located in a spot that makes direct operation difficult.

Steady Motion V1.0 for Smoother Footage

Image stabilization is provided by a 6-axis gyroscope working in conjunction with the Steady Motion V1.0 algorithm. The system minimizes the impact of camera vibrations on the recorded footage, helping to achieve smoother footage when shooting on the move. As a result, dynamic scenes can remain stable and clear even under challenging conditions.

Up to 7 hours of 4K recording

Low power consumption allows you to use the SJCAM C400 during longer recording sessions. When paired with the wireless controller, the camera provides approximately 7 hours of 4K recording. Long battery life means greater freedom while traveling, during all-day activities, and when creating extensive footage without frequent power-related interruptions.

More Creative Possibilities

The SJCAM C400 offers additional modes and features that let you tailor your workflow to the content you’re creating. Time Lapse lets you capture time-lapse footage, while Slow Motion lets you achieve a slow-motion effect. The camera also supports live streaming and webcam functionality, expanding its range of uses beyond standard video recording.

Included in the package

- Controller x1
- Camera x1
- Waterproof case x1
- Mounting frame x1
- Clip mount x2
- Adapter x1
- Mounting base x1
- Screw x1
- Lanyard x1
- USB cable x1
- Curved and flat mounts x2
- 3M adhesive sticker x1
- Cleaning cloth x1

Manufacturer	SJCAM
Model	C400
Color	Black
Standard recording	4K (16:9): 3840 × 2160, 30 fps
	2K (16:9): 2560 × 1440, 60/30 fps
	1080p (16:9): 1920 × 1080, 120/60/30 fps
	720p (16:9): 1280 × 720, 120/60/30 fps
