SJCAM C100PRO Action Camera

The SJCAM C100PRO lets you capture events from a first-person perspective without having to hold the camera in your hand. It weighs just 32 g, has compact dimensions of 60 × 20 × 26 mm, records in up to 4K at 30 fps, and offers a runtime of up to 170 minutes on a single charge. A built-in magnet makes it easy to attach the camera to metal surfaces and use various accessories, while the waterproof case allows for recording at depths of up to 30 m. It also features 5 GHz Wi-Fi, support for the SJCAM X app, webcam mode, and DashCam mode.

Record from your own perspective

The C100PRO's compact design makes it easy to capture POV footage, leaving both hands free while biking, vlogging, working, or engaging in other activities. The camera weighs only 32 g and measures 60 × 20 × 26 mm, so you can clip it to your clothes, hat, or backpack, among other things, without adding unnecessary weight. The built-in magnet also lets you quickly attach it to metal surfaces and compatible accessories, making it easy to capture a variety of perspectives, including

chest-level shots and low-angle shots while riding. The one-touch recording feature, meanwhile, lets you quickly start capturing events without navigating through complex menus.

Detailed 4K videos and photos up to 20 MP

Despite its compact size, the SJCAM C100PRO can record in 4K (3840 × 2160) at 30 fps, ensuring that videos retain a high level of detail. Other available resolutions include 2K at up to 60 fps and Full HD at up to 60 fps, and vertical modes—2K (1440 × 2560) and 1080p (1088 × 1920)—allow you to tailor the format of your footage to its intended use. The camera takes photos at resolutions up to 20 MP (5888 × 3312), and the lens offers a 120° field of view and an f/2.5 aperture. Users can also adjust the exposure by ±2 EV, set the ISO range from 100 to 3200, and choose from white balance settings including Auto, Daylight, Cloudy, Tungsten, Fluorescent, and Diving.

More Ways to Capture Moments

The C100PRO isn't limited to standard recording—it also offers Time-lapse, Slow Motion (-2x and -4x), Vertical Mode, and the ability to take photos while recording video. In photo mode, you can take standard photos, burst shots, and photos using the self-timer. The loop recording feature allows you to set a 1-minute loop at 4K 30 fps, while at other resolutions you can choose 3, 5, or 10 minutes. Video files are saved in MP4 format, and photos in JPG; support for microSD cards with capacities up to 512 GB provides ample space for an extensive collection of content—memory cards are sold separately.

Up to 170 minutes of recording and fast 5 GHz connectivity

The 730 mAh battery provides up to 170 minutes of runtime on a single charge, allowing you to record a longer workout, ride, walk, or trip without having to reach for the charger frequently. The USB-C port is used to charge the camera, and 5 GHz Wi-Fi streamlines wireless data transfer. Using the SJCAM X app, you can view a real-time preview, adjust settings, and download recordings. The camera does not support a separate remote control, but remote control is available via the app.

Ready for Water Adventures

When placed in its waterproof case, the SJCAM C100PRO can operate underwater at depths of up to 30 m. This allows you to take it surfing or snorkeling, among other activities, as well as record in rainy weather without exposing the equipment inside the protective case. The white balance settings also include a Diving mode designed for recording while diving.

An action camera, webcam, and dashcam all in one

The C100PRO can also function as a webcam—when connected to a computer, Webcam Mode lets you use it for video calls, online classes, or live streams. DashCam Mode is also available, expanding the device’s functionality to include recording while driving. When connected to a car charger, the camera can automatically start recording and save footage in a loop, allowing subsequent sections of the route to be recorded without having to manually start the device.

Included in the set

- SJCAM C100PRO camera
- Waterproof case
- Mounting frame / clip-on case
- Mounting frame with grip
- Magnetic neck strap
- Wrist strap
- Flat mounting bracket
- Curved mounting bracket (e.g., for a helmet)
- USB cable for charging and data transfer
- Mounting screw
- 2 pieces of spare 3M double-sided tape
