

SJCAM S10 Action Camera

Model: S10 64GWH

Manufacturer: SJCAM

EAN: 6972476168772

Product Code: 1298416

R6,439

SJCAM S10 64G Action Camera (White)

The SJCAM S10 lets you easily capture everyday moments, travels, activities, and spontaneous shots in 4K quality. The camera weighs just 46 g, offers a wide 150° field of view, SteadyMotion V2.0 stabilization, and a 2.51" tilting touchscreen, making it easy to take with you and monitor your recordings in real time. On its own, it provides up to 115 minutes of 4K/30 fps recording, and when paired with the Boost Pod module, this time increases to up to 290 minutes. Water resistance up to 5 m, a magnetic mount, and 5G Wi-Fi connectivity further enhance your freedom to record in a variety of situations.

Capture memories in 4K quality

Recording in 4K resolution lets you preserve important moments with rich detail and vibrant colors. The SJCAM S10 is perfect for both trips and activities in the mountains, as well as for capturing everyday moments. The wide 150° field of view captures more of your surroundings in a single frame, allowing you to showcase expansive landscapes, the course of a ride, or events unfolding

around you.

Smoother Footage with SteadyMotion V2.0

Movement doesn't have to mean a shaky image. SteadyMotion V2.0 stabilization reduces shakes and vibrations, helping you capture smooth, stable 4K footage during dynamic situations. This allows you to record children playing, pets, or active scenes with greater confidence, while maintaining clarity and detail in your footage.

2.51" Tilting Screen—Control Every Shot

The large, 2.51" tilting touchscreen makes it easy to preview the image in real time and operate the camera. You can comfortably adjust the angle while recording vlogs or taking selfies to check the frame before capturing the shot.

Record in landscape and portrait modes

The SJCAM S10 lets you switch freely between landscape and portrait recording modes. This makes it easy to create content for various platforms—from YouTube videos to TikTok, Instagram Reels, and YouTube Shorts. So you can adjust the format right during recording and create shots tailored to where you plan to share them later.

Boost Pod - Live View, Control, and Extra Power

The Boost Pod module expands the camera's capabilities by serving as a charging station, remote control, and live view center. It allows you to place the SJCAM S10 in locations that would be difficult to access with a traditional camera, and then control the frame in real time. This solution provides greater freedom in positioning the device and makes it easier to experiment with different perspectives.

Up to 290 minutes of recording

The SJCAM S10 camera alone can record 4K/30 fps footage for up to 115 minutes. When paired with the Boost Pod module, recording time at the same resolution and frame rate increases to as much as

290 minutes. The extra battery life comes in handy during longer trips, sports sessions, or hours-long shoots, allowing you to pause recording less often to recharge.

Magnetic Mount for Greater Freedom

The S10 can instantly attach to metal surfaces without the need for bulky mounts or complicated setup. The magnetic mount lets you quickly find an unusual angle and start recording a spontaneous moment. Combined with its compact design and a weight of just 46 g, this expands the possibilities for positioning the camera in various locations.

Waterproof up to 5 m

Rain, the pool area, or filming in shallow water don't have to mean the end of your recording. The SJCAM S10 is waterproof up to a depth of 5 m, so you can use it during various everyday water-related activities. This allows you to record in a wider range of situations without having to miss a shot due to splashes or rain.

Quick Connection to Your Smartphone

5G Wi-Fi connectivity and the SJCAM X app streamline your workflow with recorded footage. From the app, you can view a real-time preview, remotely control the camera, and quickly transfer recordings to your smartphone. This makes your footage easily accessible for further editing and sharing.

Included in the set

- Boost Pod module x1
- S10 camera x1
- Magnetic clip x1
- Quick-mount bracket x1
- Curved + flat mount x1
- Vertical frame x1
- Mounts x2
- USB cable x1
