Freewell Filter Set for Osmo Pocket 4P (12-Piece Set)

The Freewell Quick Swap Mega Kit was designed for DJI Osmo Pocket 4P users who want full control over the look of their shots in any conditions. The set includes 12 filters (ND8, ND16, ND32, ND64, ND8/PL, ND16/PL, ND32/PL, ND64/PL, ND1000, CPL, Glow Mist 1/4, and Light Pollution). This set allows you to work freely in both intense daylight and when photographing or filming at night. ND filters help control the amount of light reaching the sensor; the ND/PL variants additionally reduce glare and enhance color saturation; the CPL filter eliminates unwanted reflections; Glow Mist 1/4 gives the image a subtle, cinematic look, the Light Pollution filter minimizes the effects of light pollution, and the ND1000 is ideal for long exposures.

Quick replacement and full gimbal compatibility

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Thanks to the innovative QuickSwap design, changing filters is instantaneous, allowing you to seamlessly adjust settings to changing conditions without interrupting your recording. The filters were designed specifically for the DJI Osmo Pocket 4P camera, so their lightweight, precisely balanced design remains completely safe for the gimbal. The gimbal maintains full stability, allowing you to capture smooth, professional-looking footage regardless of the filter you choose.
