R2,510

Stand for Gaming Wheel PXN-A11

The PXN-A11 is a collapsible steering wheel stand designed for racing simulator enthusiasts who are looking for a functional and easy-to-store solution. It occupies only 1 sq. m of space, yet offers a fully comfortable gaming space. In addition, it does not require installation of the main structure - just mount the plate under the steering wheel and the jack. The product is equipped with mounting plates, ensuring compatibility with many models of steering wheels and pedals. It is also possible to mount the plate under the shifter.

Foldable design

Thanks to its clever design, the PXN-A11 can be folded up and put away anywhere in a few moments. When folded, its height is only 13 cm, so you can store it, for example, behind a piece of furniture or under a desk. When unfolded, the stand provides stable support for the entire racing set.

Tailored to the player's needs

The stand is equipped with an adjustment system, which allows you to adjust the positioning of the various components to the player's individual preferences. The inclination of the pedal board can be changed from 6.0° to 11.5°, which increases ergonomics and allows you to adjust the position to match your gaming chair.

Modular design

The PXN-A11 uses a mounting plate with holes that allow installation of steering wheels and pedals from different manufacturers. Thanks to this solution, the stand is compatible with a wide range of equipment - both popular brands and lesser-known models.

Wide compatibility with bases

The mounting plates are designed to support multiple configurations. The PXN-A11 shows compatibility with PXN-V10, PXN-V12, Logitech G25, G27, G29, G923, MOZA R3, R5, R9 steering wheels and bases, as well as Fanatec CSR, CSW, T300, TGT, TSPC, T500 devices. For pedals, it is possible to install PXN-A3, PD HM Gen2, G25, G27, G29, SF SMG, HBS, SF U, SF SH, TH8A and MOZA SGP models.

Expandable and configurable

The PXN-A11 offers the option to expand with additional modules, including a sub shifter board. This allows you to customize your workstation for more advanced simulation configurations and expand it as your kit grows.

Includes:

- Folding steering wheel stand x1
- Connection plate x1
- Gear shift plate x1
- Foot cap x4
- Round tube gasket x4
