

Ultima Skywave X60 Soundbar

Model: U4421

Manufacturer: ULTIMEA

EAN: 4262533460294

Product Code: 1300335

R12,224

Ultimea Skywave X60 Soundbar

The Ultimea Skywave X60 soundbar takes home theater to a new level. Equipped with dual 5 GHz wireless audio and ultra-low latency of less than 20 ms, it guarantees smooth audio synchronization when watching movies and playing games, without delays or interference. Subwoofer With NEURACORE technology featuring a triple-core DSP and dual MCU, the Skywave X60 supports up to 17 channels of immersive surround sound, while the rear wireless speakers and upward-facing driver take full advantage of the Dolby Atmos effect. The elegant design and full sound customization via the Ultimea app make the system a perfect fit for a modern living room, providing an immersive audio experience in any room.

7.1.4 surround sound with Dolby Atmos

The 7.1.4 configuration combined with Dolby Atmos surrounds you with sound from all sides. Four upward-facing speakers make the soundstage more realistic and the movement in movies or games more palpable. Two wireless rear speakers further expand the soundstage. The two-way design with

upward and side-facing drivers evenly distributes sound throughout the room, resulting in natural transitions and better spatial representation.

Powerful, controlled bass and efficient GaN amplifier

The 8-inch dual magnet subwoofer with ± 14 mm excursion generates deep, precise bass down to 28 Hz. A new-generation amplifier based on GaN technology is responsible for stability and dynamics. Less heat generation translates into higher efficiency and a cleaner signal at higher power, allowing for clarity even at higher volumes.

Advanced acoustic architecture

The extensive driver system—from tweeters to midrange and woofers—is designed to maintain consistent frequency response. As a result, dialogue is clear, details are audible, and the whole sounds harmonious regardless of the type of content.

HDMI eARC, 4K HDR, and low latency

The HDMI connector with eARC support allows you to transmit high-quality audio without compression, and the 4K HDR pass-through function allows you to maintain full image quality. This means you don't have to choose between great picture and cinema-quality sound. Less than 20 ms latency and 5 GHz wireless transmission ensure smooth synchronization of picture and sound.

Modern connectivity and smart control

Bluetooth 5.4 guarantees a stable connection with mobile devices, and the Utimea app allows you to fine-tune the sound with a 10-band equalizer and ready-made sound profiles. You can quickly change the sound character depending on what you are currently listening to. In addition, the remote control with a clear button layout makes operation easy, and the X-Upmix function allows you to transform standard content into a more spacious sound.

Included

- Subwoofer
