REDTIGER F7N WiFi 4K + 1080p Dash Cam

The REDTIGER F7N dashcam with a 64 GB card lets you record every trip in high-quality 4K UHD at the front and 1080P Full HD at the rear, so you can easily capture license plates, road signs, and traffic situations both day and night. The front camera records in 4K at 25 fps, and the rear camera in 1080p at 25 fps, providing a wide and detailed view of the vehicle's surroundings. The device is also equipped with a 5.8 GHz Wi-Fi 6 module, GPS, a 3.2-inch screen, and a 24/7 parking monitoring feature, making it useful not only while driving but also when the car is parked.

Detailed view of the front and rear of the vehicle

The Ultra HD 4K front camera provides a clear and detailed image, making it easier to analyze recordings after the trip is complete. The 1080P Full HD rear camera records the area behind the car, increasing safety while driving and parking. Simultaneous recording from two cameras allows you to accurately document traffic incidents and provides greater peace of mind every day.

Clear recordings even after dark

Night driving requires good visibility, which is why the REDTIGER F7N uses an F/1.8 aperture, a 6-layer lens, and WDR and HDR technologies to support operation in challenging lighting conditions. Additionally, the Starvis sensor improves image quality after dark, increasing the amount of visible detail and the contrast of recordings. As a result, the camera effectively captures the road situation even while driving at night, in tunnels, or under intense street lighting.

Fast Downloading of Recordings

The 5.8 GHz Wi-Fi 6 module allows you to quickly transfer files to your smartphone and conveniently manage recordings without having to remove the memory card. Downloading a 1-minute video takes about 8 seconds, and transfer speeds can reach up to 20 MB/s, which significantly speeds up sharing footage. The camera also supports GPS, which records the route, location, and vehicle speed, providing even more accurate documentation of every trip.

Round-the-clock car protection

The 24/7 parking monitoring feature helps secure your vehicle even after the engine is turned off. The camera supports Time-lapse Recording and collision detection using a built-in G-sensor, which automatically saves and locks important recordings in the event of an impact or shock. Loop recording ensures continuous recording without the need to manually delete older files. Note: The Hardwire Kit B09WCTZ3Y8 is required to use parking mode.

Ready for rain, frost, and heat

The rear camera meets the IP67 standard, so it performs well in the rain and when driving in harsh weather conditions. The device can operate at temperatures ranging from -20°C to 65°C, allowing you to use it both in winter and on hot days.

Convenient installation and quick setup

The REDTIGER F7N is equipped with a quick-mount system that makes daily use easy. The camera slides into a swivel mount, allowing you to quickly set it up for use or easily detach it. The adjustable
