

REDTIGER F9 Lite 4K 32GB Dash Cam

Model: F9 Lite

Manufacturer: REDTIGER

EAN: 5905156108424

Product Code: 1300540

R1,958

REDTIGER F9 Lite 4K 32GB Dash Cam

The REDTIGER F9 Lite is a dash cam that records in 4K UHD at 30 fps, capturing detailed footage of your route both during the day and after dark. The screenless design minimizes distractions while driving and helps dissipate heat more effectively, while built-in Wi-Fi and GPS allow for convenient management of recordings and viewing of route data via the app. The device also features ADAS systems with voice alerts, parking monitoring, and a supercapacitor ensuring stable operation even in extreme temperatures. The package also includes a 32GB memory card.

4K UHD Recording

The REDTIGER F9 Lite records video in 4K 3840 × 2160 resolution at 30 fps, allowing you to capture details such as license plates, road signs, and traffic situations with high precision. 2.5K and Full HD 1080p modes are also available, allowing you to adjust the recording quality to your needs and the capacity of your memory card. A bright F2.0 lens supports recording after dark and in low-light

conditions, helping to ensure clear nighttime footage.

Discreet design

The F9 Lite stands out with its display-free design, which minimizes driver distraction while driving. The lack of a screen also helps reduce heat generation, which translates to more stable operation during long trips and in high temperatures. Its compact form ensures the camera remains nearly invisible behind the rearview mirror once mounted.

Intelligent ADAS systems

The dashcam offers ADAS driver assistance features that help improve safety while driving. The Lane Departure system provides a voice alert if you unintentionally drift out of your lane at speeds above 60 km/h. The Forward Collision feature monitors the situation in front of the vehicle and alerts the driver to a collision risk at speeds exceeding 30 km/h. Meanwhile, Stop & Go / Front Vehicle Moving notifies the driver when the car in front starts moving, which is particularly useful during city driving and in traffic jams.

Built-in Wi-Fi and the Redtiger Cam app

Thanks to the Wi-Fi module, you can connect the camera to your smartphone and conveniently manage your recordings using the Redtiger Cam app. The app allows you to view live footage, change device settings, download recordings, and update the software via OTA without having to connect the camera to a computer. This convenient solution allows you to quickly save an important recording or check your route history without removing the memory card.

GPS and Accurate Route Recording

The camera mount is equipped with an integrated GPS module that records information about location, route, and vehicle speed. This data can be particularly useful for analyzing traffic incidents or documenting your journey. To play back footage along with a map and GPS data, you can use the REDTIGER Player software, available for Windows and Mac.

24/7 Parking Monitoring

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. With the optional Hardwire Kit (sold separately), the camera can also operate in 24-hour parking mode. The system monitors the vehicle while parked and automatically saves a recording upon detecting a shock or impact. This practical solution enhances vehicle security even when the driver is not nearby.

Loop recording and protection of key recordings

The Loop Recording feature allows for automatic recording of footage in short segments of 1, 3, or 5 minutes. Once the memory is full, the oldest files are automatically overwritten, allowing the camera to operate without the need for manual deletion of recordings. The built-in G-sensor detects sudden impacts and automatically protects critical footage from being overwritten in the event of a collision or sudden braking.

Stable operation thanks to a supercapacitor

Instead of a traditional battery, a built-in supercapacitor is used, which handles high and low temperatures better and increases the device’s durability. The camera can operate in a temperature range from approximately -20°C to 70°C, making it suitable for both winter and hot days.

Included in the set:

- Dashcam
- 32GB microSD memory card
- Mount with GPS module
- Cigarette lighter power cable (approx. 3.5 m)
- Plastic prying tool
- Electrostatic stickers x2
- Adhesive tape
- User manual

Manufacturer	REDTIGER
Model	F9 Lite

Recording resolution	4K 3840 × 2160P @30fps
Additional modes	2.5K @30fps, 1080P @30fps
Video format	MP4
Photo format	JPG
Lens aperture	F2.0
Connectivity	Wi-Fi
Mobile app	Redtiger Cam
GPS	Yes, built into the mount
Loop recording	1 / 3 / 5 min
Parking monitoring	Yes, 24/7 (Hardwire Kit required)
G-sensor	Yes
Microphone	Yes
OTA updates	Yes
Supported memory cards	microSD 32GB-256GB
Input voltage	DC 12V / 24V
Output voltage	DC 5V / 1.5A

Operating temperature range Approx. -20°C to 70°C

Internal power supply type Supercapacitor
