

REDTIGER F4 Pro WiFi 4K + 1080p 128GB Dash Cam

Model: F4 Pro(128G)

Manufacturer: REDTIGER

EAN: 5905156108479

Product Code: 1300542

R3,582

REDTIGER F4 Pro WiFi 4K + 1080p 128GB Dash Cam

Road conditions can be unpredictable, and in the event of a collision, fender bender, or dangerous behavior by other drivers, every detail counts. The REDTIGER F4 Pro allows you to record your journey simultaneously from the front and rear of the vehicle in 4K + 1080p resolution, providing a more complete picture of the situation on the road. The use of Sony STARVIS 2 technology improves recording quality both during the day and after dark, and the built-in GPS records route and speed data. Additionally, the device features 5.8 GHz WiFi 6, a 2.2" touchscreen, voice control, and a 128 GB memory card.

Recordings that may prove to be crucial evidence

In the event of a traffic incident, drivers often worry about a lack of witnesses or difficulties in proving their version of events. The REDTIGER F4 Pro records footage from two cameras simultaneously—the front camera in 4K and the rear camera in 1080p. This solution allows you to document the situation not only in front of the car but also behind it, which can be crucial when determining the course of a collision, parking, or dangerous maneuvers by other drivers. The quick clip export feature allows you to instantly share the recording for insurance or informational purposes.

Clear images even after dark thanks to Sony STARVIS 2

Night driving often involves limited visibility, which makes it difficult to read license plates or identify details of an incident. The camera uses Sony STARVIS 2 technology, which improves low-light performance, NIR sensitivity, and dynamic range by up to 2.5 times compared to standard solutions. As a result, the device effectively balances bright and dark areas of the image, helping to capture more details invisible to the naked eye. This is particularly important during nighttime travel, driving in the rain, or traveling on poorly lit roads.

Convenient operation without taking your eyes off the road

Safety is paramount while driving, which is why the REDTIGER F4 Pro offers voice control that allows you to perform selected functions without reaching for the device. Using voice commands, you can, among other things, turn on the screen, activate Wi-Fi, take a photo, lock a recording, or stop recording. An additional convenience is the 2.2" touchscreen, which allows you to quickly change settings, view recordings, and manage device functions in an intuitive way.

Wi-Fi 6 and the REDTIGER Cam app

Transferring large video files can be time-consuming, which is why the F4 Pro is equipped with a Wi-Fi 6 module operating in the 5.8 GHz band, providing download speeds of up to 13 MB/s—allowing you to transfer recordings up to 6 times faster than with a 2.4 GHz connection. Once connected to the REDTIGER Cam app, you can view live video, download recordings, manage settings, monitor GPS data, and share footage directly from your smartphone. The app also allows for OTA software updates.

Compact design that doesn't obstruct your view

The dashcam is discreetly mounted behind the rearview mirror, so it does not obstruct the driver's field of view. The device's screen is about the size of a small wireless earbud case, which helps maintain the vehicle's interior aesthetics. The design offers 240° rotation, allowing for flexible mounting and convenient adjustment of the camera's position. An additional advantage is the removable mount, which makes it easy to remove the device.

GPS that records the route of every trip

After a stressful traffic incident, it is often difficult to accurately reconstruct the course of the journey. The built-in GPS module automatically records route and speed data, creating additional documentation of the trip. This information can be helpful when analyzing the course of an incident, reviewing traveled routes, or organizing recordings from specific trips.

Automatic recording protection during a collision

In the event of a sudden impact or shock, every second counts. The built-in G-Sensor automatically detects the event and protects the relevant portion of the recording from being overwritten by the loop recording function. This ensures that the most important footage remains saved as potential evidence to help determine liability for the incident.

24/7 vehicle protection in parking lots

Leaving your car in a parking lot carries the risk of damage, and the perpetrator may leave no trace behind. The REDTIGER F4 Pro offers two parking monitoring modes that operate around the clock. Collision Lock mode uses a G-Sensor to detect impacts and automatically protect key recordings from being overwritten. A Time-Lapse mode is also available, which records long periods with lower memory consumption. Using the parking monitoring feature requires the purchase of the Hardwire Kit, sold separately.

Loop recording and a 128 GB card included

Running out of space on the memory card can result in the loss of important footage. The loop recording feature automatically overwrites the oldest files with new recordings, ensuring continuous

recording without the need for manual data deletion. The kit includes a 128 GB memory card, which allows you to store approximately 8 hours of video footage.

Reliable operation in various conditions

The device uses a supercapacitor instead of a traditional battery. This solution allows it to operate at temperatures ranging from approximately -20°C to 85°C, increasing resistance to harsh weather conditions and high temperatures inside the car on hot days.

Included in the set:

- REDTIGER F4 Pro dashcam
- Rear camera
- 128 GB memory card
- USB-C power cable
- Adhesive mount
- Electrostatic sticker
- Cable clips x5
- Cable management tool
- User manual

Manufacturer	REDTIGER
Model	F4 Pro (128G)

Front camera resolution 4K

Rear camera resolution 1080P

Sensor technology	Sony STARVIS 2
Screen	2.2" touchscreen
Wi-Fi connectivity	Wi-Fi 6 5.8 GHz
Voice control	Yes
GPS	Built-in
Loop recording	Yes

Parking monitoring Yes, 24/7 (Hardwire Kit required)

G-Sensor Camera rotation

240° OTA update

Yes Mobile app

REDTIGER Cam 5.8 GHz WiFi download speed

Up to 13 MB/s Supercapacitor operating temperature range

Approx. -20°C to 85°C Dashcam with memory card and video footage showing roads and cars.
