WOLFBOX G850 Pro 4K + 1080p 64GB Dash Cam

The WOLFBOX G850 Pro is a modern mirror-style dashcam that records front-facing footage in 4K (2160p) resolution and rear-facing footage in Full HD 1080p quality. It features a large 12-inch IPS touchscreen, fast 5.8 GHz Wi-Fi, an external GPS module, and voice control. Additional advantages include the ADAS and BSD driver assistance systems, which help improve safety while driving. Thanks to WDR, HDR, 3D DNR technology, and a bright F/1.8 lens, the device ensures high-quality recordings both during the day and after dark.

4K recording in the front and Full HD in the rear

The front camera records in 4K resolution, allowing even the smallest details of the surroundings to be visible in the recordings. The rear Full HD 1080P camera allows you to simultaneously monitor the

situation behind the vehicle, which increases safety while driving and maneuvering. Dual-channel video recording can be helpful in clarifying the circumstances of a collision or other traffic incidents. Recordings are saved in MP4 format, which is widely supported by computers and mobile devices.

Large IPS screen and user-friendly operation

The 12-inch IPS display functions as a digital rearview mirror and provides a wide, clear view. Full touchscreen operation allows you to quickly change device settings, switch between camera views, and review recorded footage. The large screen area improves the comfort of everyday use, and the modern interface makes operating the device intuitive. The design, which mounts on the factory mirror, helps maintain the aesthetic appearance of the car's interior.

Clear image even after dark

The quality of nighttime recordings is ensured by a combination of WDR, HDR, and 3D DNR technologies, which help reduce overexposure and image noise. The bright F/1.8 lens captures more light, resulting in better visibility of details after dark. The six-layer lens further improves the sharpness and quality of the recorded footage. As a result, recordings remain clearer in challenging lighting conditions.

GPS, fast Wi-Fi, and voice control

The kit includes an external GPS module that connects to the 3.5 mm jack, which records information about the route and the vehicle's location. 5.8 GHz Wi-Fi connectivity allows for fast transfer of recordings to the mobile app without having to remove the memory card. Voice control allows you to operate selected device functions without taking your hands off the steering wheel. These features enhance the convenience of daily use of the dashcam.

ADAS and BSD systems to assist the driver

The WOLFBX G850 Pro offers advanced driver assistance features that help you react more quickly to potential hazards. The ADAS system can warn of the risk of a head-on collision, lane departure, or the presence of pedestrians in front of the vehicle. Additionally, the BSD feature monitors the blind spot and alerts you to vehicles outside the driver's direct field of view. These solutions increase

situational awareness on the road and promote safer driving.

Parking monitoring and reliable operation in all conditions

The device supports a parking monitoring function with collision detection and time-lapse recording. The dashcam supports microSD memory cards with a capacity of up to 256 GB, allowing for the storage of a large number of recordings. The device is designed to operate in a wide temperature range from -20°C to +70°C, making it suitable for both winter frosts and summer heat.

Included in the set

- WOLFBOX G850 Pro dashcam (rearview mirror)
- 1080P rear camera
- External GPS module
- Power cable with car charger
- Cable clips x 5
- Mounting tape
- Rubber mounting straps x 4
- Installation tool
- User manual
