WOLFBOX G900 Pro 4K + 2.5K Dash Cam

The WOLFBOX G900 Pro is a modern dashcam designed as a rearview mirror, combining a front camera that records in 4K resolution and a rear 2.5K camera. The device features a large 12-inch IPS screen with a full touchscreen panel, a Sony STARVIS 2 IMX678 sensor, voice command support, fast 5.8 GHz Wi-Fi, and an external GPS module included in the set. The camera supports memory cards with a capacity of up to 512 GB and offers parking monitoring, collision detection, and time-lapse recording. Thanks to the combination of high-quality video and advanced safety features, it is ideal for both daily commutes and longer trips.

High-resolution front and rear vehicle recording

The front camera records in 4K quality, while the rear camera records in 2.5K resolution. This combination allows for a detailed recording of the traffic situation from two perspectives simultaneously. The clear image makes it easier to identify license plates, road signs, and other

important elements of the surroundings. Additionally, HDR technology helps preserve more detail in both bright and darker areas of the frame.

Sony STARVIS 2 IMX678 sensor

Image quality is ensured by the advanced Sony STARVIS 2 IMX678 sensor with 8 MP resolution. The use of a larger sensor and advanced image processing algorithms results in better visibility of details after dark and more effective noise reduction. As a result, recordings remain clear while driving at night, in tunnels, or in adverse weather conditions. This solution increases the chance of capturing important details regardless of the time of day.

Large IPS screen and user-friendly operation

The WOLFBOS G900 Pro is equipped with a 12-inch IPS display that serves as both a mirror and a control center for the device. The large screen area provides a convenient view of camera footage and recorded videos. Full touchscreen functionality allows you to quickly change settings and use the device's features without having to press multiple buttons. This translates to greater comfort in everyday use.

5.8 GHz Wi-Fi and external GPS module

The device supports fast 5.8 GHz Wi-Fi, which enables data transfer at speeds of up to 8 MB/s. This makes transferring recordings to a smartphone more efficient than with standard 2.4 GHz connections. The set includes an external GPS module connected via a 3.5 mm jack, which records information about the route, location, and vehicle speed. Such data can be useful when analyzing a trip or reviewing recordings.

Parking monitoring and voice control

The dashcam offers a parking monitoring feature that helps keep an eye on the vehicle even when it's parked. When connected to a suitable power kit, the device can record events 24/7 using collision detection and time-lapse recording. An additional convenience is voice command support, allowing you to control selected functions without taking your hands off the steering wheel. This solution enhances comfort and safety while driving.
