Model: G900TriPro Bumper

Manufacturer: WOLFBOX

EAN: 5905156108660

Product Code: 1300548

## **R8,085**

### **WOLFBOX G900TriPro Bumper WiFi 4K + 2.5K Dash Cam**

The WOLFBOX G900TriPro Bumper WiFi 4K + 2.5K is a modern mirror-style dash cam equipped with three cameras that record footage from different angles. The front camera records in 4K resolution, the rear camera in 2.5K quality, and the additional bumper camera records in Full HD 1080p. A large 12-inch IPS screen with full touchscreen support ensures convenient control of the device's functions, and built-in 5.8 GHz Wi-Fi enables quick transfer of recordings to a smartphone. The dashcam supports GPS, voice control, loop recording, and parking monitoring, helping to document every trip and providing greater control over the vehicle both while driving and when parked.

### **Three-angle view for enhanced safety**

The use of three independent cameras allows you to record events in front of the vehicle, behind it, and in an additional observation zone near the bumper. This solution expands the monitoring range and helps capture situations that might otherwise remain outside the frame of a standard dashcam. High-resolution recordings make it easier to recognize details of the surroundings, traffic signs, or license plates. The additional bumper camera can be particularly useful when parking, maneuvering in tight spaces, or driving off-road.

## **High-quality recordings during the day and after dark**

The dashcam uses advanced image sensors and HDR technology, which support the capture of clear footage in various lighting conditions. Thanks to improved detail reproduction, the camera handles high-contrast scenes more effectively, such as exiting a tunnel, driving into the sun, or nighttime travel. Recordings remain clearer in both bright and shaded areas of the image. This translates to more information captured in the video footage, which can be crucial when analyzing traffic incidents.

## **Large touchscreen and convenient voice control**

The 12-inch IPS screen serves as a digital mirror, providing a convenient view of the camera footage and quick access to settings. The large display area improves the user experience and makes it easy to review recorded footage. Touchscreen operation makes navigating the menu intuitive, and voice control allows you to activate selected functions without taking your hands off the steering wheel. This makes it more convenient for the driver to use the dashcam while driving.

## **Fast file transfer via 5.8 GHz Wi-Fi**

The built-in 5.8 GHz Wi-Fi module enables a wireless connection between the device and the mobile app. This allows for quick downloading of recordings, viewing of saved footage, and managing settings without having to remove the memory card. Recordings can be conveniently saved to your phone and shared as needed. This solution significantly simplifies daily use of the dashcam and speeds up access to recorded footage.

## **GPS, parking monitoring, and reliable year-round operation**

The included GPS module records the route and vehicle location, allowing you to review trip details when viewing recordings later. The dashcam supports loop recording and features related to vehicle protection while parked, such as parking monitoring and collision detection. The device supports memory cards with capacities up to 512 GB, allowing it to store large amounts of high-quality footage. Additionally, it is designed to operate in extreme temperatures ranging from approximately -20°C to as high as +70°C, allowing for year-round use regardless of the weather.

Included in the set

- WOLFBOX G900TriPro 4K dashcam
- 2.5K rear camera
- 1080P bumper camera
- GPS module
- Power cable with car charger
- Rear camera cable
- License plate mount
- User manual
- Installation tool
- Mounting tape
- Cable clips x 5
- Rubber mounting straps x 4
