

WOLFBOX i17 WiFi 4K + 2.5K 64GB Dash Cam

Model: i17(64G)

Manufacturer: WOLFBOX

EAN: 5905156108684

Product Code: 1300550

R3,884

WOLFBOX i17 WiFi 4K + 2.5K 64GB Dash Cam

The WOLFBOX i17 is a modern dashcam equipped with a 4K UHD front camera, a 1080P Full HD interior camera, and a 2.5K rear camera. The device features a built-in GPS module, fast 5 GHz WiFi connectivity, a 3-inch IPS screen, and vehicle monitoring functions while parked. Thanks to support for three recording channels, it is possible to simultaneously record the view in front of the car, inside the cabin, and behind the vehicle. This solution works well for both daily commutes and longer trips.

Recording from three perspectives

The front camera records in 4K UHD resolution, ensuring high-detail footage. The 1080P Full HD interior camera allows you to monitor the vehicle's interior, which can be useful for professional drivers, passenger transport operators, and families traveling with children. The included 2.5K rear camera expands the field of view to include the area behind the car. This combination allows for a

more complete record of the drive and road events.

Good visibility even after dark

The dashcam uses a Sony IMX335 sensor, an F/1.8 lens, and HDR and WDR technologies, which improve image quality in challenging lighting conditions. As a result, recordings remain clearer when driving at night, at dawn, or in high-contrast lighting conditions. The interior camera is additionally equipped with four IR LEDs. This allows for recording the interior of the vehicle even in low light.

Quick access to recordings via 5 GHz WiFi and GPS

Built-in 5 GHz WiFi enables fast file transfer to a smartphone using a dedicated app. This allows you to conveniently view, download, and share recordings without having to remove the storage media. The GPS module records route information and the vehicle's location. The combination of these features simplifies managing the footage and enhances its documentary value.

Parking features that enhance safety

The WOLFBOX i17 offers parking monitoring modes that help protect your vehicle even after you've finished driving. The collision detection feature automatically secures the recording upon detecting an impact or strong jolt. 24/7 parking monitoring is also available, requiring an additional constant power supply kit. This allows the user to have greater control over what is happening around the car while it is parked.

Included in the set

- WOLFBOX i17 dashcam
- Rear camera
- Power cable with car charger
- Rubber mounting straps x 4
- Adhesive sticker
- Electrostatic stickers x 2
- Cable clips x 5
- Installation tool
