WOLFBOX X3 WiFi 2.5K + 1080p 64GB Dash Cam

The WOLFBOX X3 is a dual-channel dashcam equipped with a front camera recording in 2.5K resolution at 60 fps and a rear Full HD 1080p camera. The device uses a Sony STARVIS 2 IMX675 sensor, supports HDR technology, features 5.8 GHz Wi-Fi and GPS modules, and a 3-inch IPS touchscreen. The camera also offers parking monitoring, ADAS intelligent driver assistance systems, and support for microSD memory cards with a capacity of up to 512 GB. This makes it ideal for both daily commutes and longer trips.

Detailed view of the front and rear of the vehicle

The front camera records video in 2.5K resolution at 60 frames per second, allowing you to capture more detail while driving. The higher frame rate makes recordings smoother, and dynamic road

situations remain clear. The rear camera, recording in Full HD 1080p, provides additional protection and a more comprehensive record of events. Simultaneous recording from two cameras enhances safety and allows for better documentation of the course of a potential collision.

Good visibility at any time of day

Image quality is ensured by the modern Sony STARVIS 2 IMX675 sensor, supported by HDR technology and 3D DNR noise reduction. This combination helps preserve more detail in both bright and dark areas of the recording. The bright f/1.5 lens captures light more effectively after dark, ensuring the image remains clearer during nighttime drives. The camera also performs well in challenging conditions, such as tunnels, sunset, or night driving.

24/7 Parking Monitoring

The WOLFBOX X3 can also protect your vehicle while it's parked. The parking monitoring feature allows you to record events around your car around the clock, giving you greater control over your vehicle while it's parked. If an impact or shock is detected, the camera automatically saves the video footage. Additionally, time-lapse mode allows you to extend recording time while reducing the space occupied on the memory card.

ADAS Driver Assistance Systems

The camera is equipped with features that enhance driving comfort and safety. The forward collision warning system helps maintain a safe following distance on the road. The lane departure warning can alert the driver to potentially dangerous maneuvers. The Stop&Go; feature reminds you to resume driving after stopping in traffic, which is particularly useful during city driving.

5.8 GHz Wi-Fi and Built-in GPS

The built-in 5.8 GHz Wi-Fi module allows for quick transfer of recordings to a smartphone without having to remove the memory card. This makes viewing, downloading, and sharing footage more convenient. The integrated GPS module records information about the route, location, and vehicle speed, which can be useful when analyzing trips. The combination of these features allows you to easily manage recordings and access the most important data from your journey.
