

Fanttik X11 Ace Bike Pump

Model: X11 Ace

Manufacturer: FANTTIK

EAN: 850077828348

Product Code: 1301164

R2,236

Fanttik X11 Ace Bike Pump

The Fanttik X11 Ace is a compact bike pump that combines high performance with precision. Thanks to Jet-Inflate technology, it can inflate a 700×23C tire from 80 to 100 PSI in just about 21 seconds, and its powerful brushless motor ensures fast and stable operation. The built-in 2500 mAh battery allows for extended use. All of this makes the device perfect for both daily rides and longer trips.

Fast inflation without unnecessary effort

The advanced Jet-Inflate system significantly reduces inflation time, so you can get back on the road quickly. The device delivers excellent performance—from about 21 seconds for a 700×23C road tire (80–100 PSI) to 50 seconds in the 0–80 PSI range. In addition, Accuinflate technology, precise sensors, accuracy to 1 PSI, and automatic shut-off when the set pressure is reached prevent over-inflation and eliminate the need for constant monitoring.

High-capacity battery - multiple inflation cycles on a single charge

The 2500 mAh battery ensures solid compressor performance. A single charge allows you to inflate, for example, approximately 10 700x23C road tires from 0 to 80 PSI or even 22 in the 80–100 PSI range. This solution works well both during training sessions and on longer rides.

Clear display and full control

The large, 4.5-inch color LED display ensures good visibility even on sunny days. With it, you can quickly check the current and target pressure, as well as the inflation progress, giving you full control over the process. The ability to select units (PSI / BAR) further enhances user convenience.

Compact design and portability

Its small dimensions (approx. 9.4 x 5.8 x 3.6 cm) and light weight (approx. 0.3 kg) mean the compressor easily fits in a pocket or bike bag. This is a practical solution for those who want to keep their gear with them at all times without adding extra weight.

Well-thought-out design and convenient operation

The integrated cable rotates 360° and makes it easy to connect the compressor in various positions. The device is compatible with both Schrader and Presta valves, making it suitable for a variety of applications. Additionally, the built-in stabilization system ensures smooth and comfortable operation without excessive vibrations.

Included

- Fanttik X11 Ace Compressor
- Quick-Connect Chuck
- Charging cable
- User manual

Manufacturer	Fanttik
Model	X11 Ace
