

Flytec V050 12000mah bait boat (black)

Model: V050-Black 12000mah

Manufacturer: FLYTEC

EAN: 5907085524061

Product Code: 1301568

R2,731

Flytec V050 12000mah bait boat (black)

The V050 boat is designed for maximum efficiency. It has a capacious tank that holds up to 2 kg of bait, so you can bait the fishery at several points without having to return to shore. The remote-controlled opening mechanism allows you to accurately drop the groundbait at the desired spot, which significantly increases the effectiveness of fishing.

Impressive control range - up to 500 m

Thanks to 2.4 GHz technology, you can control your boat at a distance of up to 500 meters without worrying about signal loss or interference. Stable transmission gives you full control over every maneuver even on large bodies of water.

Stable and fast on the water

Dual high-performance motors provide high power and smooth handling. The V050 can reach speeds of up to 250 m/min, while handling waves and winds of 7-8. This means you can use her even in adverse weather conditions.

One Key Cruise function

You don't need to control the throttle all the time - just activate the constant cruise speed mode to make the boat sail steadily and steadily. You, meanwhile, can focus on controlling the direction or preparing your gear.

Ready for night fishing

The boat is equipped with powerful LED lights - two white reflectors at the bow and blue lights at the stern. This makes it easy to determine the direction of your boat, and the craft remains visible even in the dark, making night fishing safer and more comfortable.

Dual power supply and long runtime

The 12.1 × 6.1 × 8 cm battery compartment accommodates two batteries simultaneously - both 5200 mAh and 12000 mAh. The boat can operate for up to 6 hours on a single charge, making it a reliable tool for long fishing sessions.

Smart safety features

The V050 is equipped with a low battery alarm system - when the battery is close to draining, the controller will beep, giving you time to return to shore.

Convenient control

The 2.4GHz remote control is simple and intuitive. It offers functions such as direction control, opening the bait tank, lighting control, constant speed mode or precise trim adjustment. This ensures that full control is always at your fingertips.
