Manufacturer: LANBERG

EAN: 5901969448108

Product Code: 1301760

R2,983

Lanberg CAT 5/5e bulk UTP cable is designed for dependable network installations where safety and consistent performance matter. The cable uses solid copper conductors with precise insulation and lagging dimensions to support data transmission up to 100 MHz, helping maintain stable connections for voice, data, and standard Ethernet applications. The Low Smoke Zero Halogen (LSZH) jacket reduces toxic and corrosive emissions in confined spaces, while a broad operating temperature range supports reliable operation in varied environments. Compliance with FCA, UKCA, WEEE, and CPR provides assurance for installation projects that require recognized regulatory standards.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
