Lanberg CAT 5/5e S/FTP bulk cable is designed for reliable structured cabling installations where consistent signal performance and safety are important. The cable combines solid 24 AWG copper conductors and HDPE insulation to support data transmission up to 100 MHz, helping maintain dependable connectivity for voice and data networks. The LSZH jacket lowers smoke and toxic emissions for safer indoor use, while S/FTP shielding reduces external interference for cleaner signals. Certified to FCA, UKCA, and WEEE standards and tested with Fluke equipment, the cable is suitable for a range of indoor cabling runs across offices, data closets, and campus environments.
