

LANBERG LAN cable Cat.6 UTP 305m solid CU LSZH grey CPR + Fluke passed

Model: LCU6L-11CU-0305-S

Manufacturer: LANBERG

EAN: 5901969448122

Product Code: 1301762

R3,780

Lanberg Cat 6 UTP bulk cable is designed for reliable structured cabling installations in commercial and residential environments. It delivers consistent data transmission for network, voice, and general-purpose cabling needs while supporting frequencies up to 250 MHz for dependable performance.

The cable uses solid copper conductors and HDPE insulation to provide stable signal integrity and durable handling during installation, while a Low Smoke Zero Halogen (LSZH) jacket reduces hazardous emissions in enclosed spaces. Rated for a wide operating temperature range and compliant with FCA, UKCA, WEEE, and CPR standards, this cable supports long-term, code-compliant deployments.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
