

Microconnect MC- POESPLITTER network splitter Power over Ethernet (PoE) Black

Model: MC-POESPLITTER

Manufacturer: MICRO CONNECT

EAN: 5711783978244

Product Code: 1304520

R889

The MC-POESPLITTER PoE Splitter delivers reliable power and data connectivity to your non-PoE devices. Designed to split a Power over Ethernet (PoE) signal into separate power and data sources, this splitter outputs 5V at 2.4A, making it ideal for powering a wide range of devices such as IP cameras, wireless access points, and other network appliances. Benefit from simplified installations by eliminating the need for separate power supplies. MicroConnect's pioneering innovation ensures a cost-effective and efficient solution for extending your network's reach while adhering to the highest European quality standards. Trust in our 20+ years of expertise to provide seamless integration and dependable performance for all your networking needs.
