Rojeco PTM673 Filterless Water Dispenser

The Rojeco PTM673 is a filterless water dispenser for cats, equipped with a 3.5-liter clean water reservoir and a separate 2-liter reservoir for used water. The device uses a 2000 mAh battery, charges via USB-C, and can operate without being constantly plugged into an outlet, making it easy to place it in a convenient spot in your home. The dispenser allows you to program water dispensing times and select portion sizes of 80, 110, or 140 ml, and its operating noise level is below 30 dB. The PTM673 model measures 332 × 230 × 153 mm, and its design combines ABS plastic with SUS 304 stainless steel components.

No filters or additional consumables

The dispenser's design does not require replaceable filter cartridges, so there is no need to regularly purchase new filters during use. Instead of a traditional water circulation system, separate tanks for clean and used water are used, which prevents drawn or contaminated water from mixing back into

the drinking water supply. This solution also simplifies daily operation of the device and reduces the number of components you need to keep track of during use.

Programming 24-Hour Water Dispensing

The control panel allows you to set the times for water dispensing and adjust the amount to suit your pet's needs. You can choose between 80, 110, and 140 ml portions, allowing you to create a schedule that matches your cat's daily routine. A 2000 mAh battery allows you to use the device cordlessly while it's running, and the operating time can last up to approximately 180 days, depending on the settings and frequency of use.

Stainless Steel Bowl and Easy Cleaning

The bowl from which the cat drinks water is made of SUS 304 stainless steel, which is well-suited for components that come into regular contact with water. The wide and relatively shallow design provides your cat with easy access to water, while the silicone nozzle directs the water directly into the bowl. The individual components can be disassembled, which makes it easy to remove sediment and keep the dispenser clean on a regular basis; however, please note that the main body is not waterproof and should not be washed under running water.

Stable construction and quiet operation

The Rojeco PTM673 has a low center of gravity, a large base, and non-slip elements that minimize movement and reduce the risk of the device accidentally tipping over. The bowl is additionally secured with a lock, ensuring it remains firmly in place while the dispenser is in use. With a noise level below 30 dB, the device can also be placed in a bedroom or living room, and the translucent tank with a scale allows you to quickly check the remaining amount of clean water.

Included in the set

- Rojeco PTM673 dispenser
- Clean water tank
- Used water tank
- Water bowl
