Telesin mobile additional selfie screen for smartphones (iOS / Android)

The Mobile Extra Screen for Smartphones solves the problem of not having a preview when filming or taking pictures with the rear camera. It wirelessly connects to your phone and shows you the image in real time, so you can see yourself while recording vlogs or taking selfies. The display allows you to enjoy the better quality of the rear camera with full frame control. It also stands out with a battery life of up to 3 hours, low latency of less than 35ms and 3-step brightness adjustment.

Precise framing from a distance

The screen allows precise framing from a distance thanks to three magnification levels: 0.5x, 1x and 2x. This arrangement makes it easier to adjust the plan for portrait shots, full body shots and —

recordings when the phone is set on a tripod. Combined with the rear camera preview, it allows you to shoot and film yourself in a more favorable way than with the front camera.

3-level brightness control

The screen offers three levels of brightness, so you can adjust it to suit the lighting conditions. Whether you're recording in strong sunlight, shade or indoors, adjusting the backlight level ensures a clear view and comfortable use of the device.

Wireless transmission in HD quality

Video previews are transmitted wirelessly using dual-band Wi-Fi transmission. What's more, the latency of less than 35 ms is great for vlogs, dynamic scenes and recordings in motion. This solution eliminates the need for cables and preserves the freedom of framing.

Strong magnetic attachment

The screen uses strong magnets to hold it stably on the phone. It's compatible with most new iPhones, and for other smartphones, just use the included magnetic ring. This ensures that the screen stays securely in place during shooting and recording.

Lightweight design and powerful battery

The device is very lightweight and compact, making it easy to carry in a pocket or small bag. In addition, the built-in 1,800 mAh battery allows for about 3 hours of use, and is charged via USB-C. All this makes it easy to take the screen with you for a full day of shooting.

Included

- Selfie screen
- USB-A to USB-C cable
- Wrist strap
- Magnetic ring
- User manual
