

Flytec V060 12000mah bait boat

Model: V060 12000mah

Manufacturer: FLYTEC

EAN: 5907085524122

Product Code: 1307471

R3,861

Flytec V060 12000mah bait boat

The V060 bait boat is equipped with a GPS system that allows you to program up to 160 positioning points divided into 4 fishing grounds. This makes it easy to deliver the groundbait exactly to the desired location, and the automatic return function will give you peace of mind even if the signal is lost or the battery is discharged.

Range of up to 500 meters

Stable connection in 2.4 GHz technology allows you to steer your boat at a distance of up to 500 meters, without the risk of interference. This is a huge freedom when fishing, allowing you to reach where access was previously limited.

Large capacity and power

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The robust tank holds up to 2 kg (4.4 lbs) of bait, making this boat ideal for long and demanding sittings. Two powerful engines provide stable cruising and wind resistance up to level 7-8, which works well even on larger bodies of water.

Longer runtime

The dual battery compartment holds two 5200 mAh or even 12000 mAh batteries, doubling the runtime and allowing you to fish longer. An intelligent system warns you when the charge is low and brings the boat back to the starting point on its own when the energy runs out.

Convenient operation and special functions

Control is via an intuitive GPS remote control with a backlit LCD screen. You have at your disposal [among others](#). constant cruise speed function, bait release button and light control. Thanks to the hook attachment, you can precisely deliver the bait kit directly to the desired location.

Visibility in all conditions

Bright LED lights on the bow and blue positioning lights on the rear make it easy to see and control even after dark. You can fish at any time of the day or night with full control over the direction and position of the boat.

Sturdy construction and comfortable use

The body is made of durable carbon fiber-reinforced ABS plastic for damage resistance. The folding metal handle makes it easy to transport, and the propeller cover protects against entanglement in aquatic plants.

Included

- Bait boat
- Remote control
- Rechargeable battery
- USB cable for charging
