Fast liner-free label printing for hospitality and retail

This thermal label printer has been developed for fast-food retail chains, restaurants, food delivery services, and logistics. The TM-L90LF liner-free thermal label printer benefits users by providing cost-effective, fast and reliable technology. It's also compatible with liner-free adhesive media.

Cost efficient

As the TM-L90LF prints both liner-free labels and receipts in order to improve the user's operational efficiency and total cost of ownership (TCO). As the printer works with adhesive-backed media, users

are able to accurately label food and drink orders - thereby increasing customer satisfaction and user accuracy.

Order processing speed

With print speeds of up to 170mm/sec, the potential benefits to the user are clear: fast order (and checkout) processing, faster drive-through services and improved customer satisfaction.

Built-in taken sensor

The next label prints automatically as the printed one is taken.

Flexible installation

Users can position the printer in the most convenient spot, thanks to a choice of vertical, horizontal or wall-mounted (using optional bracket) installation.

Saves paper

The TM-L90LF features improved paper reduction functionality that includes back feed capability, line feed adjustment and a smaller sized font. It can be set up to cut through adhesive areas, which saves paper. To further reduce paper consumption, the automatic top margin reduction function prints the top of the next receipt before cutting the current one when printing continues after auto cutting. It supports 1.5-inch, 2-inch or 3-inch media widths.
