

Robot Vacuum ULTENIC T20 PRO

Model: 8801380602

Manufacturer: ULTENIC

EAN: 6924843251884

Product Code: 1308473

R6,172

Utlenic T20Pro Cleaning Robot

The Utlenic T20Pro vacuums with suction power of up to 12,000 Pa, mops floors, and can run for up to 200 minutes, allowing it to handle cleaning comprehensively without constant involvement from household members. 360° LiDAR navigation with the TrueMapping 2.0 system allows it to quickly learn the layout of rooms and save up to 5 maps, while AI Obstacle Avoidance helps it efficiently navigate around obstacles in its path. The robot adapts its cleaning to the surface, effectively picks up hair, and navigates thresholds up to 20 mm high, moving freely around the house. With a noise level of 60 dB, you can use the device even while working or in the evening. Once cleaning is complete, it returns to the docking station, which automatically empties the dustbin, allowing you to forget about this task for up to 90 days. The app, Apple Watch, remote control, and voice control provide convenient management of its operation and let you tailor cleaning to your daily routine.

Precise mapping and a well-planned cleaning route

360° LiDAR technology accurately maps the surroundings, and TrueMapping 2.0 allows it to create a map of your home in just a few minutes, minimizing missed spots and unnecessary repeat passes. A single pass of laser scanning identifies the layout of rooms, furniture, and obstacles, providing the robot with the information it needs to navigate smoothly. As a result, the device does not move randomly but uses a detailed map tailored to the actual layout of your home.

Obstacle Avoidance Day and Night

The Utlenic T20Pro uses an RGB camera and an AI system to recognize up to 70 types of objects in its path and precisely navigate around them both day and night. The Precise 3D Obstacle Avoidance system helps it respond appropriately to objects it encounters, while the Smart Anti-Stuck System supports smooth navigation around rugs and cords, reducing the risk of getting stuck. The robot also features Cliff Detection, which detects stairs and edges to help prevent falls.

Save up to 5 maps

The Utlenic T20Pro robot vacuum is also ideal for multi-level spaces—you can save up to 5 maps in the app. For each map, you can customize the cleaning mode and sequence, the layout and connections between rooms, and even assign custom names to rooms. This customization lets you tailor the robot's operation to specific areas of your home and your daily needs, rather than using a single setting for the entire space every time. Available features include multi-floor mapping, quick mapping, custom modes, and Matrix Cleaning.

Clean Where You Want—and Avoid Specific Areas

The map also gives you control over where the robot shouldn't go. In the app, you can designate No-Go zones and restricted zones, protecting selected areas and the objects within them without having to set up physical barriers. The schedule feature, meanwhile, lets you set cleaning times, so the Utlenic T20Pro can work while you're away and take care of the floors before your family returns home. The combination of maps, schedules, cleaning sequences, custom modes, and room-specific settings allows you to tailor the cleaning routine to your home's layout and daily rhythm.

Thorough Dirt Removal from Floors and Carpets

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

The Utlenic T20Pro uses a brushless motor and suction power of up to 12,000 Pa to effectively remove dust, crumbs, hair, and other debris from various surfaces. The V-shaped roller aids in debris collection, and the Floor Adaptation system helps the robot adjust its operation for both hard floors and carpets. The hybrid Anti-Tangle brush, combining bristles and silicone, reduces hair tangling and helps reach dirt trapped in crevices. The robot removes up to 99.5% of hair, making it ideal for homes with pets.

Adaptive Carpet Boost - Increased Suction Power on Carpets

When it rolls onto a carpet, the Utlenic T20Pro automatically detects it and increases suction power, so you don't have to manually switch settings between different floor types. The Adaptive Carpet Boost system helps remove dust and hair trapped between the fibers—with a removal efficiency of up to 99.8%. The robot applies 8 N of pressure, which helps it reach into crevices and remove stubborn dirt. When the device returns to a hard floor, its operating mode adjusts accordingly, allowing you to conveniently clean rooms with multiple types of flooring.

Effortless Navigation Over Thresholds

Thresholds, door tracks, and small steps don't have to interrupt the cleaning cycle. A dual-jointed bionic mechanical foot enables the Utlenic T20Pro to overcome obstacles up to 20 mm high, making it easier to move between different areas of the home. As a result, the robot can continue its planned route even where different surfaces do not align perfectly at the same level. Combined with intelligent navigation, this solution reduces the need to manually carry the device while cleaning.

Automatic Emptying - Up to 90 Days of Convenience

After completing its cleaning cycle, the robot can use the automatic emptying station, which transfers the collected debris from its dustbin. The system allows for up to 90 days of use without manual emptying, requiring less attention for day-to-day maintenance. Debris is collected in a sealed 3.5-liter bag. Contactless emptying minimizes exposure to dust, and the system traps 99.7% of allergens and features E12 filtration with 99.5% efficiency. This is a practical complement to scheduling and autonomous navigation—the robot can not only perform scheduled cleaning on its own but also reduce the number of tasks needed after it finishes.

Choose the most convenient control method

The Utlenic T20Pro robot offers several control options, allowing you to tailor its operation to the situation. The app lets you remotely start cleaning, create schedules, set no-go zones, and customize the robot's operation, including suction power and water flow. With an Apple Watch, you can start and stop the device and schedule cleaning without reaching for your phone. The robot also supports voice control via Amazon Alexa, Siri, Google Home, and IFTTT. The set also includes a remote control that works independently of Wi-Fi and the app—it allows you to control the direction of travel, start and pause cleaning, perform spot cleaning, return to the charging station, and increase or decrease suction power and water flow.

Up to 200 minutes of runtime

The Utlenic T20Pro can run for up to 200 minutes and clean an area of up to 240 m² on a single charge. Three cleaning modes are available: simultaneous vacuuming and mopping, vacuuming only, and mopping only, allowing you to tailor the cleaning method to your current needs. If the battery level gets too low during operation, the robot will automatically return to the charging station to recharge, then resume cleaning from where it left off.

Included in the set

- Cleaning robot
- Charging station
- Remote control
- HEPA filters (2)
- Side brushes (2)
- Mop pad covers (2)
- Mop pad cover holder
- Cleaning brush
- Floor cleaning solution (250 ml)
- User manual
- Quick start guide

Manufacturer	Prosenic
Model	Utlenic T20Pro
Maximum suction power	12,000 Pa
Suction power adjustment	Yes
Operating time	Up to 200 min
Maximum cleaning area	Up to 240 m ² on a single charge
Noise level	60 dB
Pressure	8 N
Maximum obstacle clearance height	20 mm
Water flow control	Yes
Spot cleaning	Yes
Automatic suction boost on carpets	Yes
Navigation	360° LiDAR
Mapping system	TrueMapping 2.0
Obstacle avoidance	AI Obstacle Avoidance
Quick mapping	Yes
Multi-floor mapping	Yes
Number of maps stored	Up to 5
No-Go zones	Yes
Restricted zones	Yes
Cleaning schedule	Yes
Custom cleaning modes	Yes
Customizable cleaning for specific rooms	Yes
Automatic dustbin emptying	Yes
Maximum time between manual emptying	Up to 90 days
Filtration	E12
Controls	App, Apple Watch, remote control, voice commands
Supported voice assistants	Amazon Alexa, Siri, Google Home, IFTTT
Wi-Fi	2.4 GHz
