

Monitor mount DJI/ZHIYUN

Model: 10104400EU

Manufacturer: NEEWER

EAN: 6921268811631

Product Code: 1309231

R3,280

Monitor Mount for NEEWER DJI/ZHIYUN/MOZA Gimbals

The NEEWER GA005 monitor mount is an adjustable mount designed for use with DJI, ZHIYUN, and MOZA handheld gimbals. It offers smooth 360° rotation, a maximum load capacity of 1 kg, and three 1/4" threads that allow for mounting additional accessories. The mount measures 146 × 34 × 36 mm and weighs 110 g, allowing you to expand your filmmaking setup without significantly increasing its weight. It is compatible with various monitors and is particularly recommended for 7-inch models.

Wide Compatibility with Popular Gimbals

The mount works with many stabilizers used for filming and video production. It is compatible with the DJI Ronin S, Ronin SC, RS 2, RSC 2, RS 3, and RS 3 Pro, as well as with ZHIYUN WEEBILL LAB, CRANE 2S, CRANE 3S, CRANE 3 Lab, and WEEBILL S gimbals. It can also be used with the MOZA AirCross 2 stabilizer, allowing you to use a single mount across various equipment setups.

Smooth 360° Adjustment

The mounting mechanism allows the monitor to rotate a full 360°, making it easy to position the screen for your current workflow. The monitor can be tilted and rotated to improve visibility while framing, recording, or reviewing footage. Smooth, damped movement allows you to comfortably adjust the screen's position without having to remove the mount.

Adjustable Damping

The damping force of the mechanism can be adjusted using the included L-shaped Allen wrench. This allows you to tailor the mount's operation to the monitor you're using and your individual preferences while working. Thanks to this solution, you can adjust the rotational resistance and set the mechanism so that changing the monitor's position is comfortable and controlled.

Stable Mounting with Two M4 Screws

The NEEWER GA005 is installed using two M4 screws, ensuring a secure connection to a compatible gimbal. The design also incorporates a rosette plate and an integrated hand-operated screw, which further enhance the stability of the mount. This solution allows for a secure attachment of the monitor and reduces the risk of the mount accidentally loosening during use.

Additional space for accessories

The mount features three 1/4" threads, allowing you to expand the setup with additional equipment. You can attach, among other things, a microphone used during interviews, a magic arm, a super clamp, and other compatible accessories. As a result, the mount can serve as a practical component of an expanded setup for filming, photography, or vlogging.

Durable aluminum alloy construction

The mount is made of CNC-machined aluminum alloy, which combines durability with a lightweight design. The surface features a black anodized finish, and the entire unit weighs just 110 g. This makes the mount suitable for mobile use during outdoor shoots, where both the reliability of the equipment and ease of transport are crucial.

Compact Dimensions and a Load Capacity of Up to 1 kg

With a length of 146 mm and dimensions of 146 × 34 × 36 mm, the mount retains a compact form while still allowing for the installation of monitors weighing up to 1 kg. This solution is suitable for various monitors, with a particular focus on 7" models. The combination of low weight, an adjustable mechanism, and additional mounting points allows for convenient use of the mount during filming, photography, and vlogging.

Included

- GA005 Monitor Mount x1
- Rosette plate x1
- M4 screw x2
- L-shaped Allen wrench x1

Manufacturer	NEEWER
Model	GA005
Product Name	Adjustable Monitor Mount Extended Version
Application	Mounting a monitor to handheld gimbal stabilizers
Material	Aluminum alloy
Maximum Load	1 kg
Weight	110 g
Dimensions	146 × 34 × 36 mm
Length	146 mm
Rotation range	360°

Number of 1/4" threads 3

Recommended use	Various monitors, especially 7" monitors
DJI Compatibility	Ronin S, Ronin SC, RS 2, RSC 2, RS 3, RS 3 Pro
ZHIYUN Compatibility	WEEBILL LAB, CRANE 2S, CRANE 3S, CRANE 3 Lab, WEEBILL S
MOZA Compatibility	AirCross 2
