ANLAN Miracle Hair Styling Kit

ANLAN Miracle combines three ways to style your hair thanks to interchangeable attachments with diameters of 25 mm, 32 mm, and 38 mm. Automatic 360° rotation, two operating modes, and 5 temperature settings ranging from 120°C to 200°C allow you to freely change the look of your hairstyle and tailor your styling to your hair type. With 65 W of power, fast heating, a ceramic coating with an aluminum plate, and even heat distribution, it helps you efficiently create curls and waves, while the easy-to-read LED display makes it simple to check your selected setting.

Three attachments, endless styling possibilities

Three interchangeable attachments let you tailor your styling to the desired look. The 25 mm styling tip is used to create fine, well-defined curls, while the 32 mm styling tip allows you to achieve loose, natural-looking waves. The 38 mm styling brush, in turn, helps curl your hair and add volume to your hairstyle.

Automatic curling without complicated movements

The barrel's automatic 360° rotation makes it easy to wrap a strand of hair—simply press the button to activate the mechanism, and the device will rotate as you create curls. This feature reduces the need for repetitive hand movements and makes styling easier, even for those who are just learning how to curl their hair. If you want to control how the strand is wound yourself, you can use manual mode—the ANLAN Miracle doesn't limit you to a single styling technique.

Ceramic coating for gentler styling

The ceramic coating on the aluminum plate helps distribute heat evenly during styling, reducing the risk of overheating specific sections of hair. This helps minimize moisture loss, which is particularly important when regularly using high heat. This allows you to effectively style your hair while minimizing the negative impact of heat styling on your hair.

Even heat distribution for consistent results

Even heat distribution across the heating surface helps heat the entire wrapped strand, allowing you to form a curl with just one wrap. This results in clearly defined curls that hold their shape all day long.

Fast heating that streamlines your morning styling routine

The ANLAN Miracle heats up to 120°C in about 23 seconds—you won't have to wait long to start styling, which you'll certainly appreciate on busy mornings. It takes about 10 seconds to move to the next temperature level, allowing you to easily adjust the settings while styling.

Five temperature settings for different hair types

The easy-to-read LED display shows the temperature, and the five-level adjustment lets you choose 120°C, 140°C, 160°C, 180°C, or 200°C. The 120°C setting is intended for hair damaged by high heat and for those particularly concerned with minimizing further damage; 140°C is for fine and soft hair; 160°C for normal hair, and 180°C for thick and coarse hair. The highest setting, 200°C, is designed for quick styling, long-lasting results, and thick, coarse hair, allowing you to adjust the intensity to suit the condition of your hair and the desired effect.

Features that make styling easier

The clip holds the strand securely in place during styling, and the non-slip buttons make the device easy to use. A built-in anti-pinch sensor enhances safety during automatic hair winding. Comfort is further enhanced by an integrated stand where you can set the heated curling iron down, as well as a 2-meter cord that rotates 360°.

Auto-Shut Off and Convenient Storage

The auto-shut-off feature, which activates after approximately 60 minutes, enhances safety and gives you peace of mind if you forget to turn off the device after styling. Support for 100–240 V and 50/60 Hz AC power increases the curling iron’s versatility, and the included carrying case makes storage easy. The main unit measures approximately 330 × 60 × 42 mm and weighs about 718 g, while the 14.1 cm-long barrel provides ample surface area for comfortably winding strands during styling.

Included in the set

- 3-in-1 automatic curling iron
- 25 mm styling barrel
- 32 mm styling tip
- 38 mm styling brush
- Storage case
- User manual
