

MEROSS Smart Irrigation Controller (MST200-EU)

Model: MST200-EU

Manufacturer: MEROSS

EAN: 6942349221934

Product Code: 1311623

R2,589

MEROSS Smart Irrigation Controller (MST200-EU)

The MEROSS MST200-EU Smart Irrigation Controller lets you conveniently manage your garden's watering and automatically adjust the schedule to current conditions. The model supports 2 independent irrigation zones, allowing you to set separate watering schedules for your lawn, flower beds, or vegetable garden. Control is via the Meross app or voice commands through Alexa, Siri, Google Home, and SmartThings. The device is equipped with corrosion-resistant brass connectors, a built-in filter that protects the mechanism from dirt, and an IP66-rated housing. Note: A Meross Smart HUB, sold separately, is required to use smart and remote control features.

Two independent watering zones

The controller is designed for convenient management of larger or more demanding gardens. Two independent outputs allow you to set separate schedules for different zones, helping you better tailor water usage to specific plants. This means one part of the garden can be watered more frequently, while the other is watered only when needed. This solution also works well when using various garden accessories, such as sprinklers or drip lines. Physical buttons on the housing provide an additional convenience, allowing you to manually activate a selected zone without using your phone.

Convenient control via the app and voice

Once connected to the Meross Smart HUB, users can manage the device through the mobile app. You can quickly change schedules, start watering from anywhere, and control each section individually. Integration with popular smart home systems also allows for voice commands, enhancing the convenience of daily use. The controller is compatible with smartphones running iOS 13 or later and Android 8 or later. An existing 2.4 GHz Wi-Fi connection is also required for proper setup.

Smart water-saving features

The MST200-EU model helps reduce unnecessary water consumption thanks to the Rain Skip feature, which can automatically skip watering during rainfall. The system also analyzes weather conditions such as rain, cloud cover, frost, or strong winds, allowing you to better tailor the schedule to the conditions in your garden. This solution reduces the risk of overwatering plants and saturating the lawn. An additional safety feature is the automatic shut-off after 15 minutes during manual operation. This makes it easier to avoid accidentally leaving the sprinkler system on.

Robust construction for outdoor use

The controller is designed for daily use in varying weather conditions. Brass connectors increase the device's durability and help protect it against corrosion and leaks. A built-in metal mesh filter protects the mechanism from debris in the water supply, ensuring more stable operation of the entire system. The IP66-rated housing ensures resistance to dust and splashes, making the device ideal for use in the garden throughout the season. The controller operates at pressures ranging from 5 to 100 PSI and supports standard European G3/4-14 threads.

Water consumption monitoring and convenient installation

The device allows you to monitor water consumption for each zone separately. Data is presented in the app as clear daily, weekly, monthly, and annual charts, helping you better control watering costs. Its compact size and power supply via four AA batteries allow you to install the controller virtually anywhere without the need for additional wiring. Easy installation means the device can be quickly connected to an existing garden irrigation system. It's a practical solution for those who want to manage watering more conveniently while reducing water consumption.

Included

- MEROSS MST200-EU Smart Irrigation Controller
- User manual
- PTFE tape

Manufacturer	MEROSS
Model	MST200-EU
Control	Meross app
Compatibility	Alexa, Siri, Google Home, SmartThings
Connectivity	433 MHz RF
Requirements	Meross Smart HUB
Required network	2.4 GHz Wi-Fi
Power supply	4 × 1.5V AA batteries (not included)
Protection rating	IP66
Water pressure range	5-100 PSI / 0.04-0.7 MPa
Operating temperature	1°C to 60°C
Connections	2 × MHT, 1 × FHT
EU thread type	G3/4-14
Dimensions	140 × 50 × 170 mm
