This personal shredder ensures data security in private areas or home offices. Thanks to the separate CD cutting unit, CDs and DVDs, credit cards and store cards can be easily shredded. The shredded material is sorted into the separate CD waste container and you can dispose of it separately. Using the LED display, you can easily view the operating state of the personal shredder. An integrated light barrier starts the device automatically and switches it off again after the paper feed ends. The automatic reverse rectifies paper jams and ensures smooth operation. The level of the waste container is always visible through the inspection window, making timely emptying possible. In standby mode, the energy management and control system EMCS ensures low power consumption.
