FOSSIBOT Cart for the F2400

The foldable FOSSiBOT cart makes it easy to transport the F2400 and F1800 portable power stations. It is equipped with two durable wheels with double ball bearings, which ensure smooth and stable maneuvering on various types of surfaces. The design is rated for a load of up to 22 kg, making it easier to move the heavy power station.

Foldable and Easy to Store

The cart can be quickly folded or unfolded, making both transport and storage easier. When folded, it measures 30 × 36.5 × 46 cm and weighs 1.55 kg, so it can easily be placed in a car or another space with limited room. Its light weight also makes it easy to carry when not in use.

Adjustable height

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The handle offers three height settings: 46, 61, and 96 cm, allowing you to adjust its position to suit your current needs. The setting is changed using a button located at the top of the handle, making adjustment quick and convenient. So you can easily prepare the cart for transport and adjust the handle height before you start pushing it.
