

GIGABYTE GP- GME1000GM 1000W PG5 PSU

Model: GP-GME1000GM PG5

Manufacturer: GIGABYTE

EAN: 4719331557409

Product Code: 1313199

R4,094

The GIGABYTE GAMING 1000GM PG5 is a power supply designed to provide reliable and efficient power to PCs and servers. With a total output of 1000 W, this power supply ensures stable voltage across all essential connections, including +3.3V, +5V, and +12V rails. Equipped with 80 PLUS Gold certification, it operates with an efficiency of 90%, minimizing wasted energy and reducing heat generation, making it an environmentally friendly choice for users seeking to optimize power consumption.

Its fully modular cable management system enhances system organization, allowing for easy installation and flexibility in cable connections. The GIGABYTE GAMING 1000GM PG5 features robust protection mechanisms - overvoltage, overpower, short-circuit, undervoltage, overcurrent, overheat, and surge protection ensure the safety of your components. A 135 mm fluid dynamic bearing cooling fan provides efficient airflow while operating quietly, offering a balance between performance and noiseless operation. With a mean time between failures (MTBF) of 100,000 hours, this power supply is built for long-lasting reliability, making it an ideal choice for gamers and professionals alike.
