Manufacturer: LEPRO

EAN: 4894495043828

Product Code: 1313240

R1,700

LEPRO N1-5 RGB Smart LED Strip, 5 m

Give your interior a unique atmosphere with the LEPRO N1-5 RGB smart LED strip, which transforms ordinary lighting into an interactive, colorful space. The model uses AI LightGPM 4 technology, allowing the light to adapt to your preferences, mood, and lifestyle, creating personalized effects without complicated setup. You can control it with your voice, sync the lighting with music, draw inspiration from photos, or create your own color compositions in the app. The flexible design lets you create original lighting arrangements in your living room, gaming room, or bedroom, and remote control via Wi-Fi gives you full control over the atmosphere in your home from anywhere.

Your personal lighting designer

The LEPRO N1-5 RGB uses Lepro LightGPM 4 technology, which acts as a smart lighting designer. The system analyzes your preferences and, over time, increasingly tailors colors and effects to the style you like best. The more you use the strip, the more accurately it selects lighting scenes,

remembering your favorite combinations and the atmosphere that suits you best. This solution is designed for people who want more than standard presets and ready-made schemes.

Work with the app on your own terms

Forget about manually setting effects and scrolling through dozens of modes. Just tell the Lepro app what mood you want to create, and the system will instantly prepare the right lighting. A romantic evening, a party with friends, a gaming atmosphere inspired by your favorite game, or a festive vibe—you can activate it all with a simple voice command. The built-in voice assistant analyzes your commands and adjusts brightness, colors, and lighting effects within seconds. The strip also works with Amazon Alexa and Google Assistant, making control even more convenient.

Lighting inspired by photos and your surroundings

You don't have to describe the effect you want—the image recognition feature allows the app to analyze photos and create customized lighting compositions based on them. Just take a photo of the room, and the system will suggest the perfect lighting to match its character. You can also upload a movie poster, a game screenshot, or a photo of your favorite character, and the strip will automatically recreate an atmosphere inspired by the chosen aesthetic. It's a great way to create a cohesive design without having to select colors yourself.

Dynamic effects synchronized with music

LightBeats Music Sync technology makes the light react to the rhythm of the music, creating dynamic and engaging lighting effects. Colors and animations change in time with the sounds, giving every gathering, party, or evening with music a completely new character. This solution is also perfect for gaming, watching concerts, and creating an atmospheric space for relaxation.

Millions of scenes and unlimited possibilities

Advanced AI algorithms generate up to 10 of the best-matched lighting effects from a vast number of potential color and animation combinations. The system analyzes emotions, voice commands, and your preferences to create scenes tailored to specific situations. Whether you want to create a calm atmosphere for relaxation, energetic party lighting, or immersive lighting for your gaming setup,
