Puluz 120W LED Studio Light with Color Temperature Control and Remote Control

The Puluz 120W LED lamp is a versatile light source designed for photography, video recording, live streaming, and studio work. It offers color temperature adjustment ranging from 2700K to 6500K, allowing you to achieve both warm, atmospheric lighting and neutral light that accurately reproduces natural colors. Brightness can be smoothly adjusted from 5% to 100%, making it easy to tailor the effect to any scene. With a high brightness of 8600 lm and a light intensity of 12,000 lux at a distance of 1 meter, this light is perfect for professional photo shoots, video production, or creating content for social media.

Natural colors and convenient operation

A Color Rendering Index (CRI) of at least 85 ensures more realistic color reproduction, which is crucial for portrait photography, product shoots, or live streams. The light is equipped with a 2.4 GHz control system, allowing you to conveniently adjust settings using the remote control without having to approach the device. An additional advantage is its compatibility with the Bowens mount, which allows you to use various types of light modifiers, such as softboxes or octaboxes, giving you even greater freedom when working on a scene.

Stable operation and effective cooling

The Puluz LED Video Light features a built-in cooling system with a fan and thermal protection, which effectively dissipates heat and helps extend the LED’s lifespan to up to 50,000 hours. A stable 220V AC power supply ensures safe and reliable operation during long shoots and multi-hour sessions. The light is ideal for wedding photography, commercial shoots, streaming, film production, webinars, and children’s photography.

Included

- LED lamp x1
- Power cable x1
- Remote control x1
- User manual x1
- Packaging x1

Manufacturer	Puluz
Product type	LED Video Light
Power	120W
Power supply	AC 220V
Color temperature	2700K-6500K

Brightness adjustment range 5%-100%
