

# LED strip LEPRO N1-10-EU 10m Wi-Fi

Model: N1-10-EU

Manufacturer: LEPRO

EAN: 4894495041473

Product Code: 1321201

## R2,236

### LEPRO N1-10-EU 10-meter Wi-Fi LED Strip

The 10-meter LEPRO N1-10-EU LED strip is a modern RGB + IC neon lighting solution that works with the Lepro app, Amazon Alexa, and Google Assistant. This model offers voice control, music synchronization, segmented color changing, and a dimming function. The device connects directly to a 2.4 GHz Wi-Fi network and does not require an additional gateway or hub, allowing you to start using its features just moments after installation.

### LightGPM 4 Technology and User-Customized Lighting

The strip is equipped with LightGPM 4 technology, which creates personalized lighting effects. The system analyzes user preferences, remembers the most frequently selected settings, and tailors subsequent suggestions to individual tastes. The image recognition feature also allows you to upload photos of rooms, posters, or graphics, based on which the app creates color schemes tailored to a specific interior.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

## Segment-by-Segment Control and Even Lighting

The LEPRO N1 model allows you to control individual segments of the strip, enabling you to create complex lighting effects and smooth transitions between colors. Users have access to as many as 16 million colors, and each meter is equipped with 96 LEDs and 16 integrated circuits. A special, frosted PVC coating evenly diffuses the light, eliminating the effect of visible light spots and giving the installation an aesthetic appearance.

## App and voice control, plus music synchronization

All settings are accessible via the Lepro app, which allows you to control the lighting from anywhere. Multiple people can use a single device simultaneously, and the grouping feature enables management of multiple Lepro products on the same network. The strip works with LightBeats algorithms, which analyze the rhythm of the music being played and dynamically adjust the lighting effects to the sound, creating a unique atmosphere during gatherings, movie nights, or gaming sessions.

## Flexible Design and Easy Installation

Thanks to its high flexibility, the strip can take on various shapes and be adapted to individual designs. The manufacturer includes mounting clips and screws that facilitate installation on walls, furniture, and other surfaces. The 24 V operating voltage enhances safety, while the scheduling and timer functions allow the lighting to be automatically turned on and off at selected times.

## Included in the set

- 10-meter LEPRO N1 LED strip
- Controller
- Power supply with a European plug
- Mounting clips
- Screws
- User manual in Polish
- Manufacturer's packaging
