Model: 4515C005

Manufacturer: CANON

EAN: 4549292181623

Product Code: 1328895

R6,250

The RF 50mm F1.8 STM is a compact and highly versatile RF prime lens capable of high quality images. The wide aperture gives this lens excellent low-light prowess which means you'll be able to keep it on your camera all day long, even when light levels drop. With a fixed 50 mm focal length offering a neutral perspective and remarkable close focusing to capture details close at hand, you'll soon discover new creative possibilities and take your photography to a whole new level. The lens is small, light and quiet thanks to a redesign of optics for its RF mount and STM motor and is ideal for advancing your skills as a photographer.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
