PGYTECH RetroVa All-in-One Ultimate Gift Set for the iPhone 16 Pro Max

The PGYTECH RetroVa All-in-One Ultimate Gift Set enhances the iPhone 16 Pro Max with a grip featuring buttons and dials, microSD card storage, and a 2.35× telephoto lens for photographing distant subjects. The set also includes a custom-fit case, a lens adapter ring, a tripod collar, a lens pouch, and a camera strap. The set is ideal for everyday photography, as well as for shooting from a greater distance or working with a tripod.

Buttons and dials that facilitate creative work

The grip features a zoom lever, a control dial, a multifunction button, and a shutter release button. Pressing the shutter button halfway focuses the image, pressing it fully takes a photo, and holding it

down activates continuous shooting. The control dial lets you adjust settings such as ISO, exposure, and white balance, while the lever is used to operate the zoom and switch between focal lengths. The grip connects to the iPhone via Bluetooth, and the built-in 300 mAh battery provides approximately 48 hours of remote control operation.

2.35× Lens - Take Photos from a Greater Distance

The included 2.35× lens provides a 282 mm focal length equivalent on the iPhone 16 Pro Max with 5× optical zoom, making it easier to capture distant details when photographing landscapes, architecture, events, or nature. Its design features 13 elements in 3 groups, and the use of extra-low-dispersion glass and high-refractive-index glass is intended to minimize aberrations and help preserve image detail. The lens weighs approximately 227 g, and its minimum focusing distance is 8 m. The kit also includes a lens adapter ring and an Arca-Swiss-compatible tripod collar.

Save content to a microSD card and use the PGYTECH app

The microSD slot built into the mount allows you to save photos and videos outside of the iPhone's internal storage. UHS-I and UHS-II cards are supported, including microSDXC and microSDHC, with a maximum theoretical transfer speed of up to 312 MB/s. External storage also supports RAW photos and supported video formats, including ProRes and HEVC. Meanwhile, the PGYTECH Pro Imaging app offers retro filters, manual mode, various save formats, and the ability to adjust settings such as ISO, shutter speed, and white balance.

MagSafe Case and Practical Mounting Options

The kit includes a case designed for the iPhone 16 Pro Max, made of polycarbonate and featuring a design inspired by classic cameras. It supports MagSafe and does not interfere with wireless charging. There is a 1/4" thread at the base of the mount, and the included lens collar is Arca-Swiss compatible, making it easy to mount on a tripod. The kit also includes a camera strap with an adjustable length of 820–1360 mm and a load capacity of up to 20 kg, allowing you to wear the phone around your neck or sling it over your shoulder.
