PGY ProShot Phone Case for iPhone 17 Pro Max

The PGY ProShot case is designed for iPhone 17 Pro Max users who want to enhance their smartphone with additional photography and video accessories. The aluminum construction combines a lightweight design with a precise fit for the phone's case, without restricting access to its most important features. Expansion ports allow you to attach, among other things, a quick-release mount, a 1/4"-20 mount, and a cold shoe adapter. An inner silicone layer helps dissipate heat from the smartphone, while the slim frame ensures comfortable one-handed use. The tool-free mounting system also makes it easy to quickly attach and remove the back plate of the cage.

Flexible Expansion Options

The design features expansion ports that allow you to customize the setup to suit your current workflow. The cage is compatible with a mount featuring a quick-release mechanism, a 1/4"-20 threaded attachment, and a cold shoe adapter, allowing you to install compatible accessories.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Individual components can be freely combined, and the quick-release mechanisms allow you to efficiently change the configuration without the time-consuming task of disassembling the entire kit.

Precision-machined from aluminum

The aluminum plate was CNC-machined from a single block of material and tailored to the shape of the iPhone 17 Pro Max. Specific areas of the design were cut out so as not to obstruct the phone’s functional elements or hinder its use. The surface has also been anodized, ensuring a smooth finish and a meticulously refined appearance. Despite its metal construction, the case weighs only 61 g, and the narrow frame minimizes the extra bulk around the phone and helps maintain proper balance during one-handed use.

Heat Dissipation and Quick Installation

The internal silicone pad fits snugly against the phone, facilitating rapid heat transfer to the aluminum frame. The material’s properties facilitate further heat dissipation, which helps reduce the smartphone’s temperature and maintain a comfortable grip during use. Installation requires no tools—the back cover snaps into place when pressed and remains securely in position. When you need to remove it, simply press the release button to quickly access your phone.

Manufacturer PGYTECH

Model	P-PG-090
Material	Aluminum alloy, silicone
Weight	61 g
Dimensions	172.72 x 89.44 x 15.75 mm
